

Environmental Policy

STMicroelectronics recognizes the importance of conducting business and managing environmental issues in a responsible manner in order to ensure the long term sustainability. Therefore, we are committed to minimize our environmental impact in all our activities and by the products we are developing.

Environmental care is an integral part of STMicroelectronics and it is therefore always present in all Company activities through the following commitments:

- Strive for pollution prevention, reduced consumption of natural resources, reduction of waste, and minimize impact (social and environmental) of chemical substances.
- Commitment to follow the ten commandments of our EHS Decalogue.
- Pursue continuous improvement in our environmental performance.
- Maintain relevant Environmental certification(s) of all our manufacturing and large R&D sites worldwide.
- Incorporate environmental criteria into all stages of our production cycle, from the design phase to procurement, sale and end of life.
- Maintain a Management System based on best current practices all over the Company.
- Comply with environmental regulations & other requirements globally and locally.
- Maintain and evolve our Risk Assessment Program to manage risk identification, analysis, reduction and avoidance.
- Commitment to strong internal and external controls and auditing to ensure that environmental procedures are carried out and to identify and prioritize areas for improvement.
- Provide appropriate training to all our employees and all necessary information to our stakeholders.
- Develop long term relationship with our suppliers and contractors choosing those with the highest environmental standards and practices.
- Promote environmental responsibility among employees.
- Clearly communicate STMicroelectronics environmental policies, practices, and impact to interested parties.
