1 Description

The FLI59xx family of controllers are highly integrated mixed signal LCD controllers for multi-function LCD monitors and LCD TV applications supporting up to WUXGA resolutions. The FLI59xx has integrated advanced video image processing from Faroudja as well as a proven ADC/PLL and Ultra-Reliable DVI or HDMI 1.1 compatible digital receiver with FRC to ensure proven PC graphics compatibility.

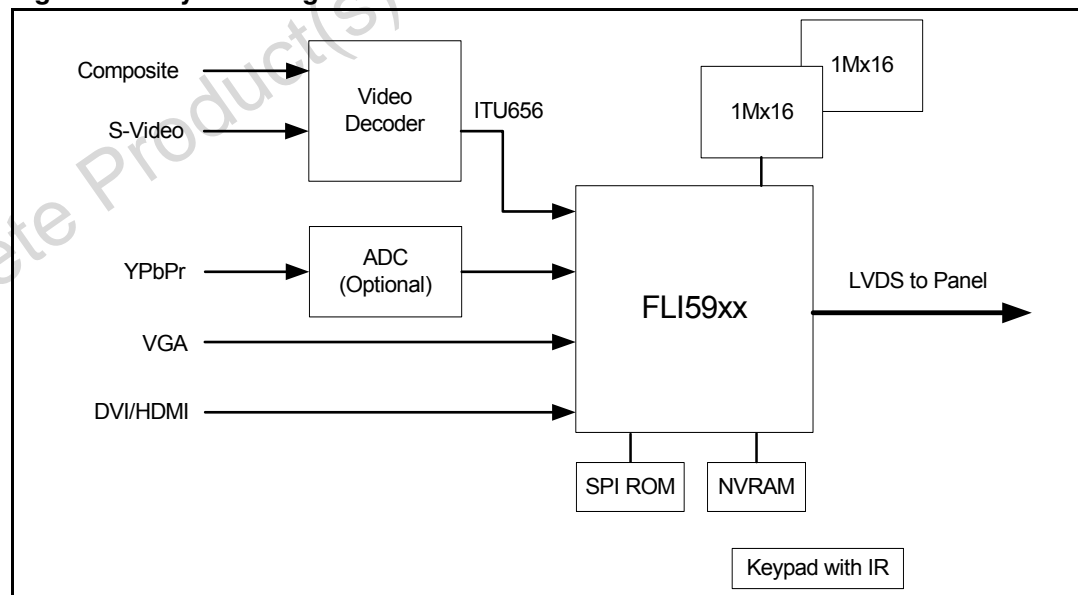

With Emmy award winning Faroudja DCDi® technology incorporating horizontal enhancement technology, advanced TV color control with Adaptive Contrast and Color (ACC) and Active Color Management-3D (ACM-3D), in addition to industry leading Motion Adaptive De-interlacing (MADi), advanced film mode detection, and response time compensation, the FLI59xx processes SDTV inputs to output images that are crisper with life-like quality.

The integrated picture-in-picture, embedded microcontroller, versatile OSD engine, low bandwidth general purpose ADC, and dual LVDS transmitters (or optional 24-bit TTL output) enables cost-effective HDTV-ready multi-function LCD monitor or LCD TV solutions.

The FLI59xx family of controllers includes the following products:

- FLI5962 supports up to 1920 x 1200 resolutions with DVI
- FLI5962H supports up to 1920 x 1200 resolutions with DVI and HDCP
- FLI5968H supports up to 1920 x 1200 resolutions with HDMI and HDCP
- FLI5928H supports up to 1366 x 768 resolutions with HDMI and HDCP
