Description

The STM32429I-EVAL evaluation board is a complete demonstration and development platform for the STMicroelectronics ARM® Cortex™-M4 core-based STM32F429 line microcontrollers.

The integrated ST-LINK/V2 provides an embedded in-circuit debugger and programmer for the STM32 MCU. Extension headers make it possible to easily connect a daughterboard for your specific application.

The STM32429I-EVAL evaluation board includes everything required for beginners and experienced users to develop applications quickly.
1 Demonstration software

Demonstration software is preloaded in the Flash memory on the board for easy demonstration of the device peripherals in standalone mode. For more information and to download the latest version available, refer to the STM32429I-EVAL demonstration software available on www.st.com.

2 Ordering information

To order the evaluation board based on the STM32F429NIH6 MCU with a 4.3” color TFT LCD with a resistive touchscreen, use the order code: STM32429I-EVAL1.
