

STMicroelectronics Company presentation

January 2026

We are creators and makers of technology

One of the world's largest semiconductor companies

~**48,000** employees
of which ~**9,000** in R&D

\$11.8 billion revenues
in 2025

Over **80** sales & marketing
offices serving over **200,000**
customers across the globe

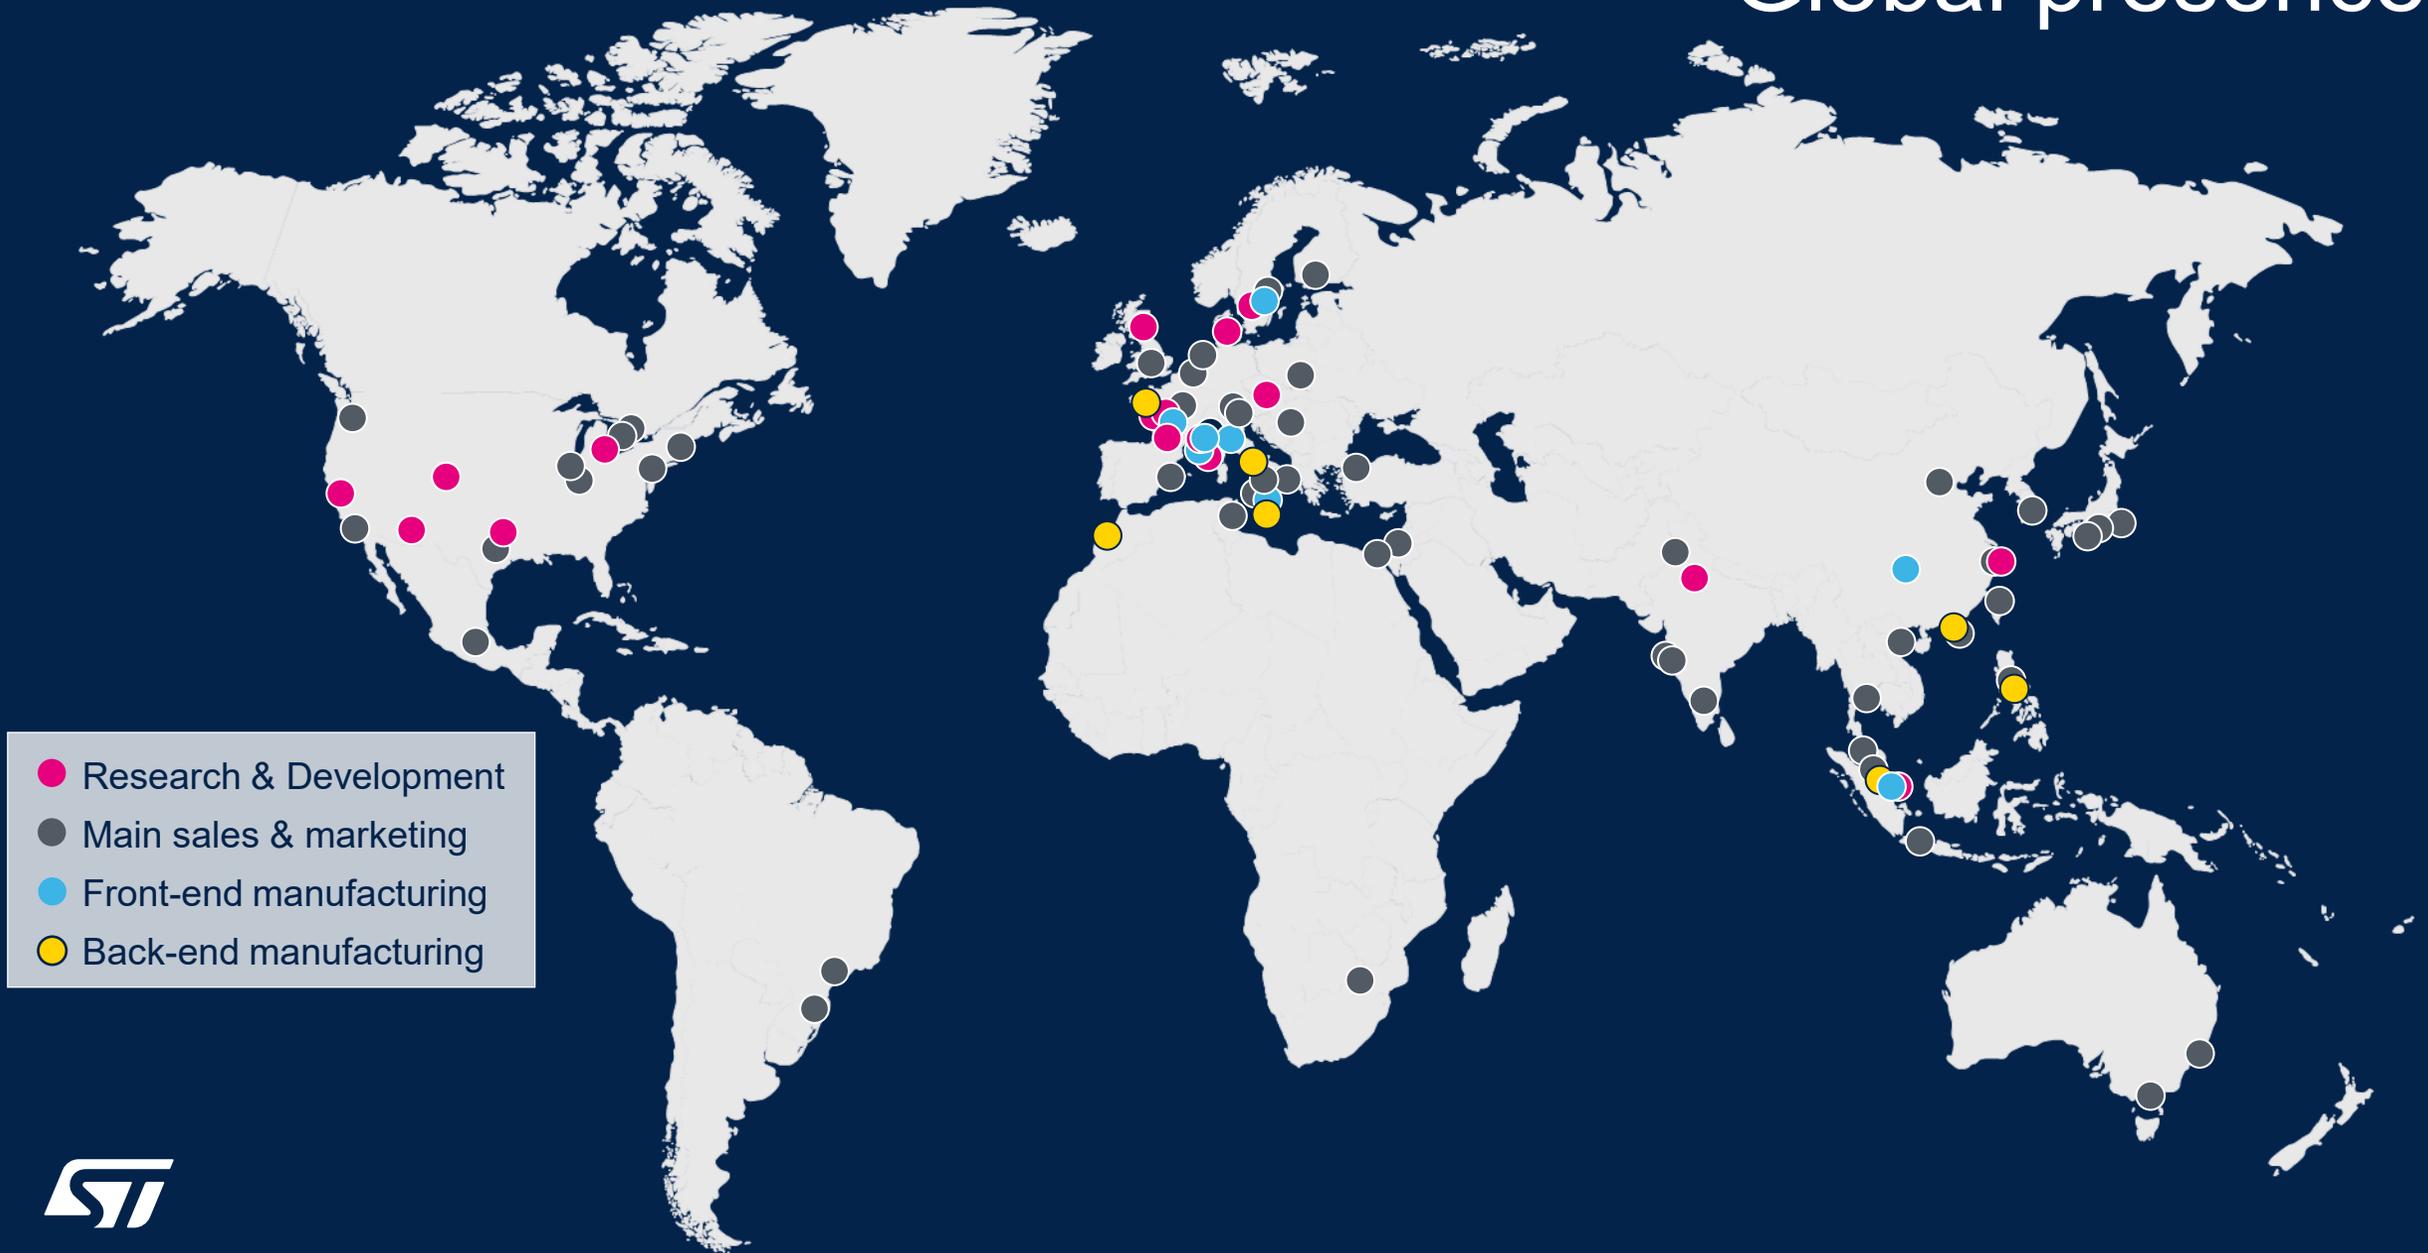

14 main manufacturing
sites

Signatory of the United Nations Global Compact (UNGC)
Member of the Responsible Business Alliance (RBA)

Global presence

Jean-Marc Chery
President &
Chief Executive Officer

**ST Executive

ST stands for

life.augmented

Everywhere microelectronics
makes a positive contribution to people's lives,
ST is there.

Our value proposition for all our stakeholders

For our shareholders

Return value in line with our objective

Sustainable and profitable growth

For our customers

Provide differentiating enablers

Independent, reliable & secure supply chain

For all our stakeholders

Committed to sustainability

Our values: Integrity – People – Excellence

Our technology starts with you

At ST, we create
technology that starts with
You

Our
employees

Our
customers

Our
partners

Where you find us

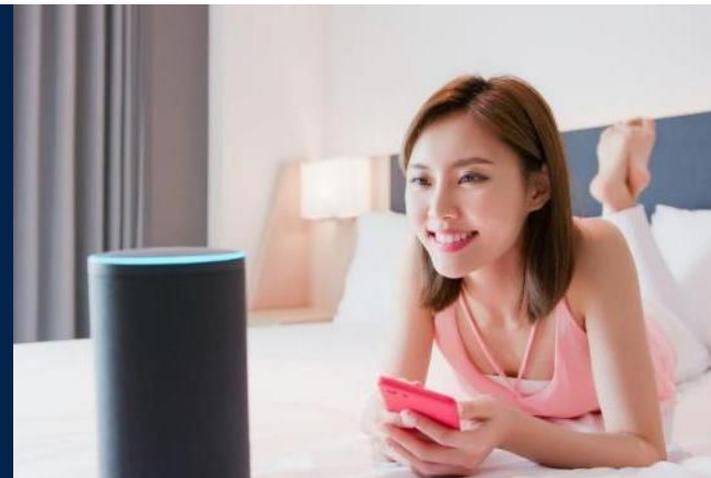

Making **driving** safer, greener, and more connected

Enabling the evolution of **industry** towards smarter, safer, and more efficient factories & workplaces

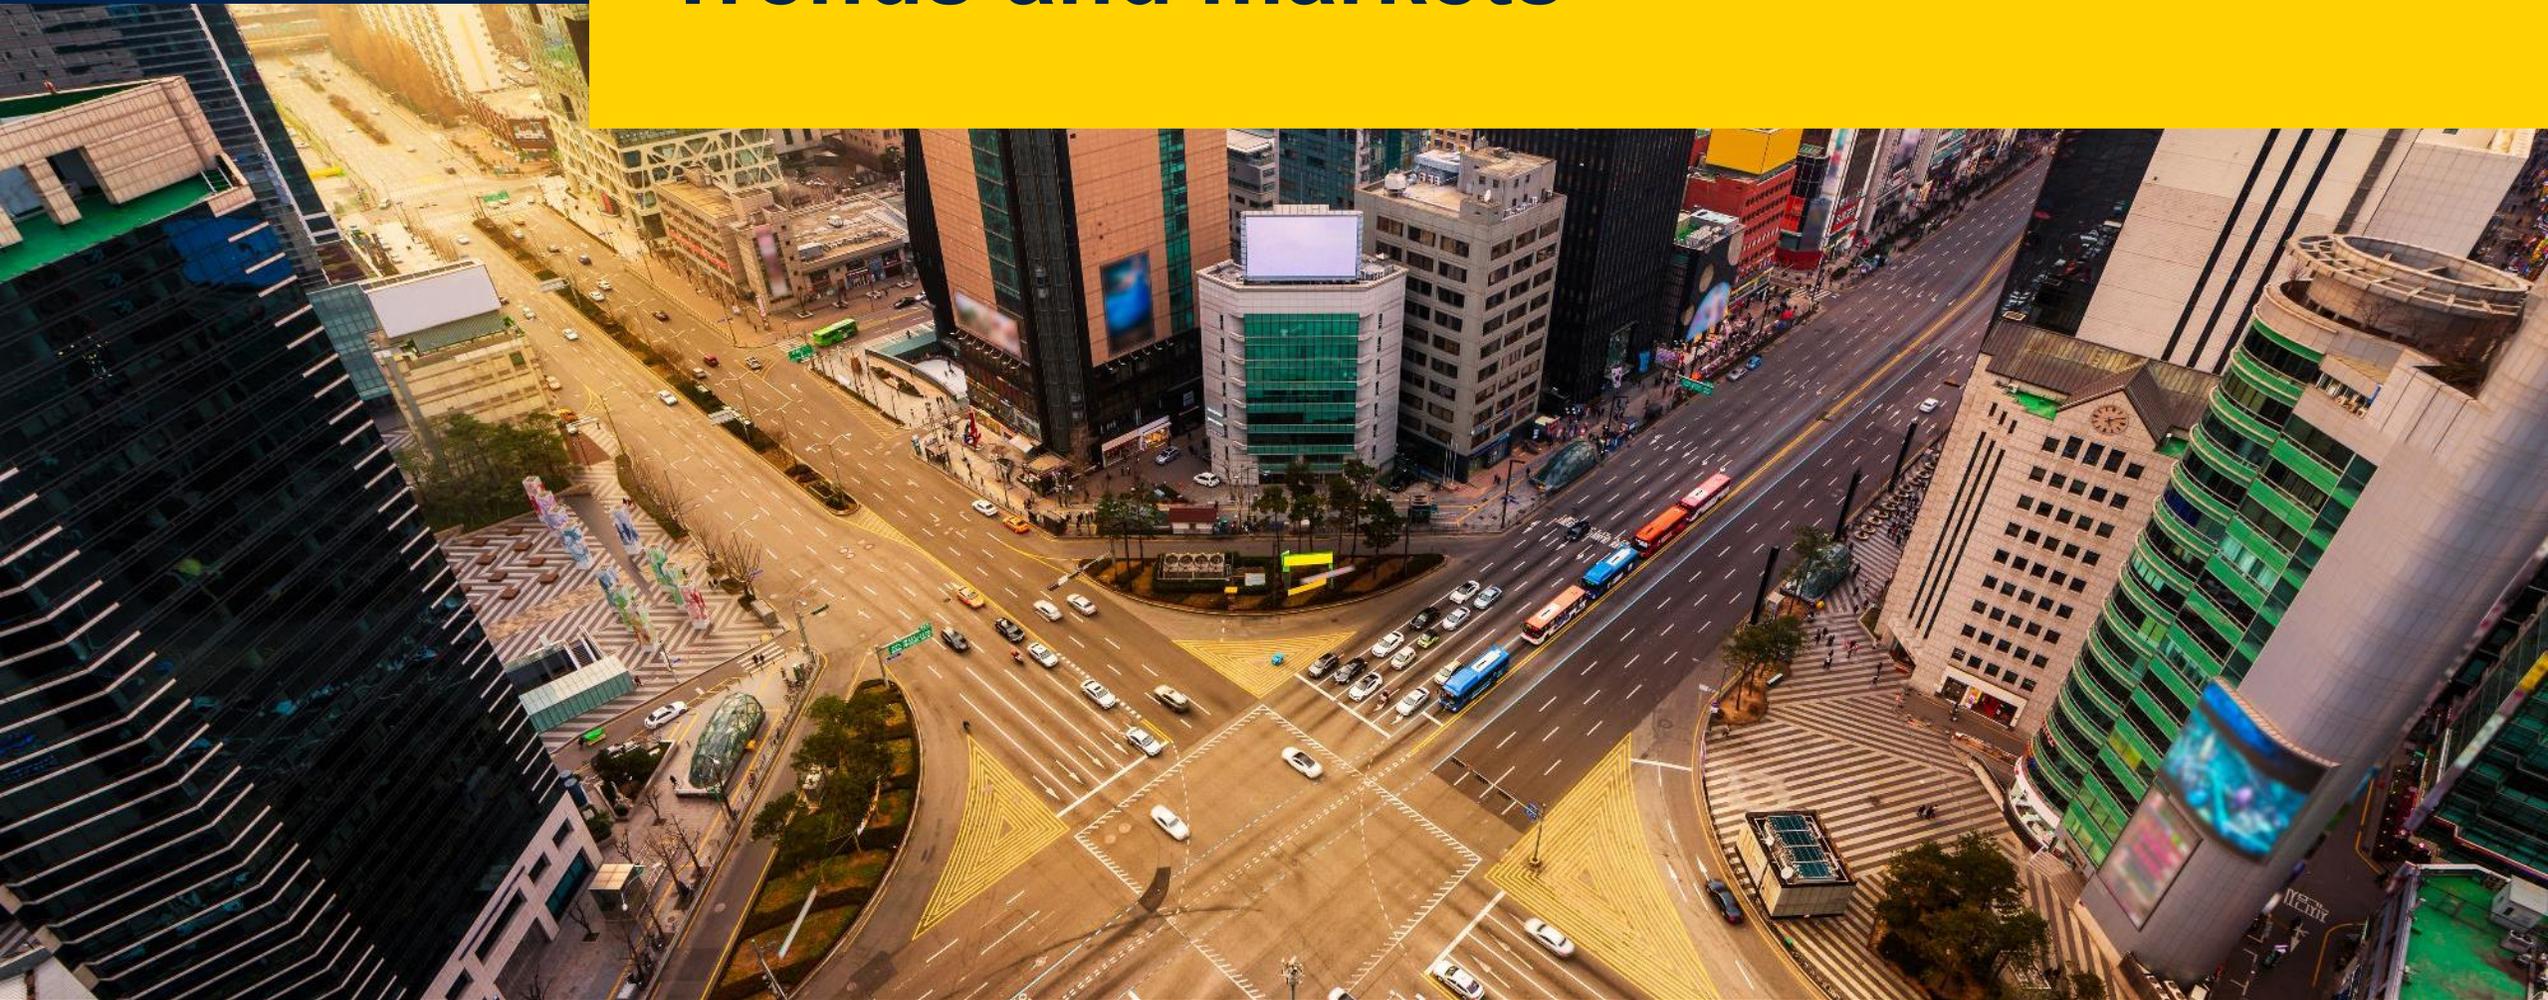

Making **homes & cities** smarter, for better living, higher security, and to get more from available resources

Making everyday **things** smarter, connected, and more aware of their surroundings

Trends and markets

Our strategy stems from key long-term enablers

Smart Mobility

Helping car manufacturers make driving safer, greener, and more connected for everyone

Power & Energy

Enabling industries to increase energy efficiency everywhere and the use of renewable energy

Cloud-connected Autonomous Things

Supporting the proliferation of secure, connected, autonomous devices enabled by edge AI

Smart mobility

ST provides innovative solutions to help our customers make driving safer, greener and more connected for everyone

Increase safety for road users & driver comfort and convenience.

Road crashes carry a high human toll and cost **\$500B+** every year

Affordable, desirable electric vehicles

Electric vehicles to grow to ~40% of total vehicle sales by 2030

Cleaner, greener Internal Combustion Engines (ICE)

ICEs in ~**75%** of new vehicles produced 2026-2030

Power & energy

ST technology and solutions enable customers to increase energy efficiency everywhere & support the use of renewable energy sources

Rising demand for and usage of electrical energy

Electricity demand set to grow **2X** total global energy demand through 2027

Increase use of renewable energy

Solar and wind energy to exceed **19%** of global electricity generation in 2026

Decrease carbon emissions to reduce global warming impact

43% greenhouse gas emission reduction from 2019 levels needed to limit global warming to 1.5°C by 2030

Cloud-connected Autonomous Things

Supporting the proliferation of secure, connected, autonomous devices enabled by edge AI

Cloud-connected devices

More than **40 billion** IoT connected devices by 2030

Digital security for all data

Global IoT security market to reach **~\$140 billion** by 2030

Edge AI proliferation

By 2035, **74%** of all data will be processed locally

Our strategy

We address four end markets

Automotive

Industrial

Personal electronics

**Communications
equipment
& computers peripherals**

Our strategic objectives

Automotive

Lead in **car electrification**

Lead in **car digitalization**

Industrial

Lead in **embedded processing**

Lead in **Power & Energy Management**

Lead in **Sensors**

Accelerate in **Analog**

Personal electronics

Lead in **selected high-volume smartphone** applications with differentiated products or custom solutions

Leverage **broad portfolio** to address high-volume applications

Communications equipment & computers peripherals

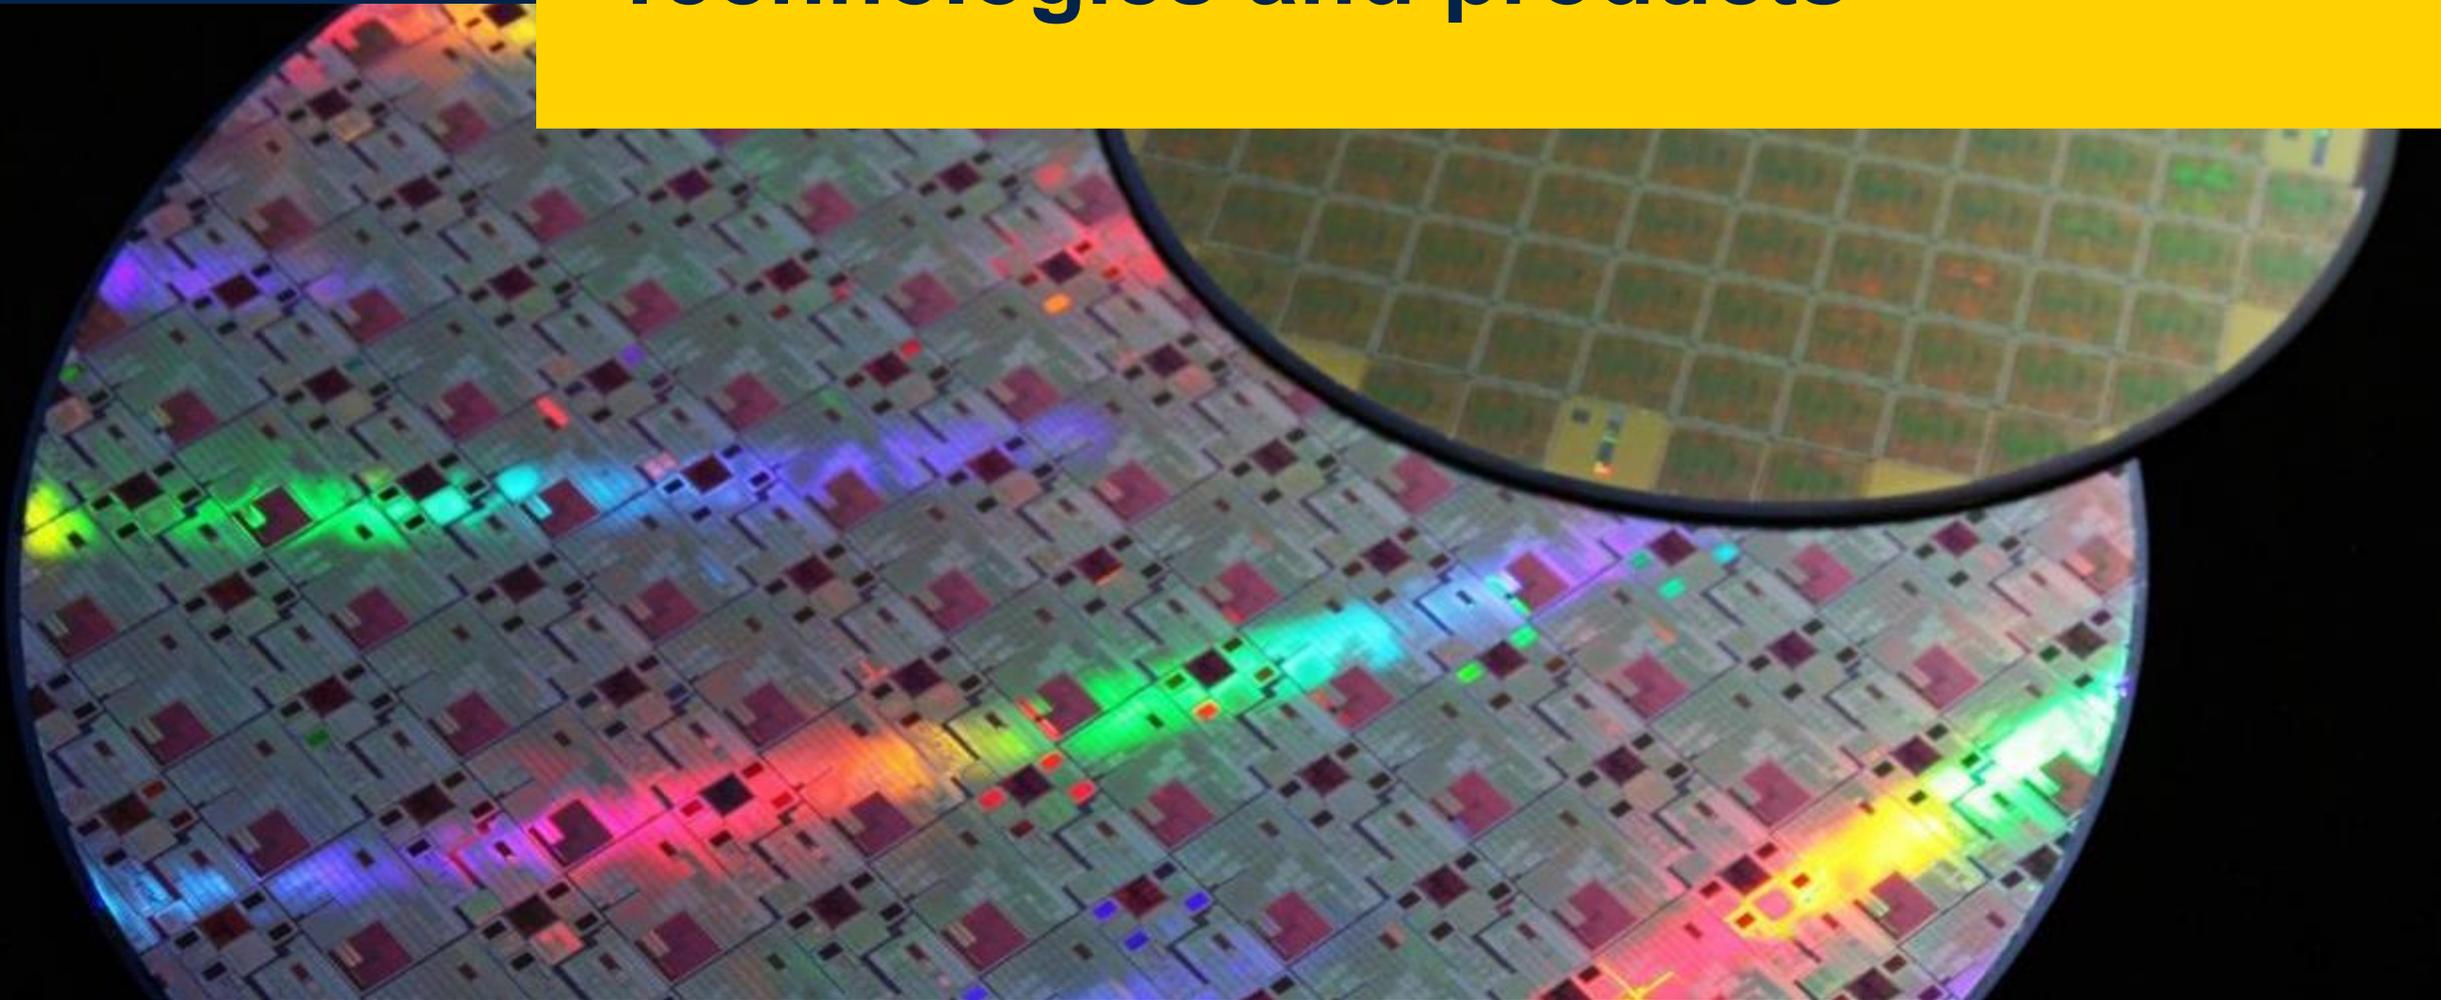

Address **selected high-volume applications** with differentiated products or custom solutions

Leverage **broad portfolio** to address high-volume applications

Technologies and products

Differentiated technologies are our foundation

MEMS
for sensors & micro-actuators

Smart Power: BCD
(Bipolar - CMOS - Power DMOS)

FD-SOI CMOS
FinFET through Foundry

Discrete, Power MOSFET, IGBT
Silicon Carbide, Gallium Nitride

Analog, RF CMOS & BiCMOS,
Silicon photonics

Vertical Intelligent Power

eNVM CMOS

Optical sensing solutions

Packaging technologies

Leadframe – Laminate – Sensor module – wafer level

Our products and solutions enable customer innovation

Dedicated automotive ICs

Analog, industrial & power conversion ICs

GP MCU & MPU, Wireless solutions, secure MCU, EEPROM

Discrete & power transistors

MEMS & optical sensing solutions

ASICs based on ST proprietary technologies

Dedicated automotive ICs

Automotive MCU

Scalable single and multicore MCU solutions
Targeting cost-sensitive to highly advanced applications
Supporting next-generation architectures and X-in-1 approach
Comprehensive development ecosystem

Infotainment & telematics

Outstanding audio fidelity and positioning accuracy in every condition
Secure smartphone mirroring
Safe vehicle connectivity with wide set of peripherals

ADAS solutions

Image signal processors
Radar transceivers
V2X communication solutions
Automotive CMOS image sensors
Automotive inertial sensors

Automotive analog & power

Solutions for battery management, traction, braking, airbag, door zone, engine, PMIC
VIPower* intelligent power switches, high-side & low-side drivers
LED drivers
Automotive grade power discrete
Complete system kit solutions

Discrete & power transistors

Key power technologies & packages for: Car electrification, power management, motor control

High-voltage and low-voltage silicon power MOSFETs (STripFET*, Planar & MDmesh*)
IGBTs. Power bipolar transistors
Silicon carbide MOSFETs
Gallium nitride (GaN) on silicon power and RF transistors
LDMOS & DMOS RF power transistors
ACEPACK* power modules. SLLIMM* intelligent power modules

Diodes, rectifiers, thyristors (SCR), AC switches

Silicon carbide (SiC) & high-voltage and low-voltage silicon diodes
Ultra-fast & bridge rectifiers
Power Schottky diodes & field-effect rectifiers
Thyristors (SCR) & triacs
ACS* AC switches

Transient voltage suppressors (TVS) EMI filtering & protection ICs

ESD protection
EOS & lightning surge protection
Current limiters
IPAD* integrated EMI and ESD protection devices
Integrated passive devices

Analog, industrial & power conversion ICs

Power management

- AC/DC & DC-DC
- MOSFET, IGBT, SiC, GaN gate drivers
- Analog / digital controllers
- Linear voltage regulators
- Intelligent power switches
- Galvanic isolation
- Digital power
- Smart power GaN
- Battery management | eFuses

Analog products

- Operational amplifiers, comparators, LDOs
- Current sensing amplifiers
- Filtering & conditioning
- Interfaces & transceivers
- Reset & supervisors
- Powerline communication
- IO-Link
- Rad-hard

Motion control

- Brushed DC motor drivers
- Brushless DC motor drivers
- Stepper motor drivers

Application specific ICs

- PMIC, pre-amps for data storage & servers
- Wireless charging, touch controller, display
- PMIC for personal devices
- Medical ICs

MEMS & optical sensing solutions

Motion sensors

Accelerometers & gyroscopes
Inertial modules & smart sensors
Vibrometers, inclinometers
Magnetometers
T-Plus: Motion MEMS with embedded temperature sensor

Environmental & biosensors

Biosensors (motion + bio-signals)
Barometers, pressure sensors
Temperature sensors
Electrostatic sensors
MEMS microphones

Micro actuators

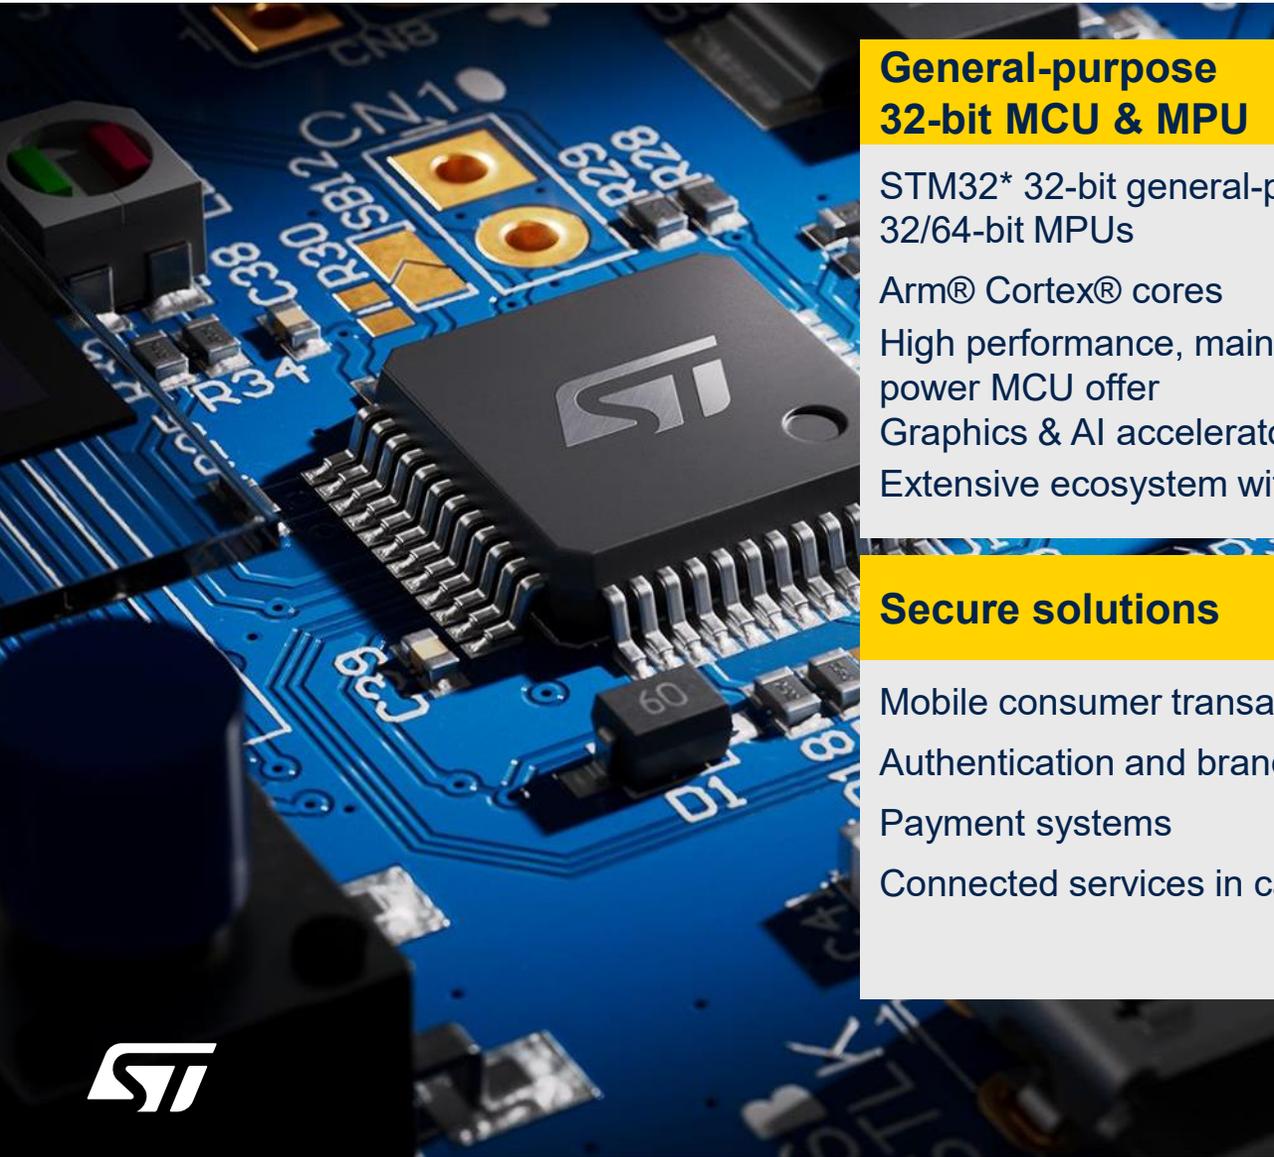

Actuators for printheads
Piezoelectric actuators
Electrostatic actuators
Electromagnetic actuators
Thermal actuators

Optical sensing solutions

FlightSense* ToF proximity & multi-zone ranging modules
3D FlightSense ToF sensors
BrightSense* global shutter CMOS image sensors
Ambient light sensors
Micro-optics
Custom optical solutions

General-purpose MCU & MPU, secure solutions & NFC

General-purpose 32-bit MCU & MPU

STM32* 32-bit general-purpose MCUs and 32/64-bit MPUs

Arm® Cortex® cores

High performance, mainstream, ultralow power MCU offer

Graphics & AI accelerators

Extensive ecosystem with edge AI

Wireless 32-bit MCU

Bluetooth® Low Energy ICs

Zigbee, Thread, Matter

Wi-Fi modules

Sub-1 GHz & Sigfox-compatible devices

LoRaWAN® technology

STM32 DNA, extended ecosystem for RF

Secure solutions

Mobile consumer transactions

Authentication and brand protection

Payment systems

Connected services in cars

NFC & Memory

NFC / RFID Tags

Dynamic NFC tags

NFC / RFID Readers

High-performance & high-endurance EEPROMs

ASICs based on ST proprietary technologies

ST offers strategic independence and product differentiation to ASIC customers through three key enablers:

- Advanced manufacturing technology platforms
- Worldwide design resources and advanced IP
- ST's Integrated Device Manufacturer supply chain

Digital ASICs

System-on-chip designs in CMOS and FD-SOI technologies with eNVM option, as well as FinFET (through foundry)

Analog & RF ASICs

Unique expertise in GHz wireless RF, analog, and optical device design using advanced technologies, such as RFSOI, BiCMOS, silicon photonics & millimeter wave

MEMS and imaging ASICs

Proprietary micromachining process, deep expertise in MEMS integration
Custom imaging solutions and premium foundry services

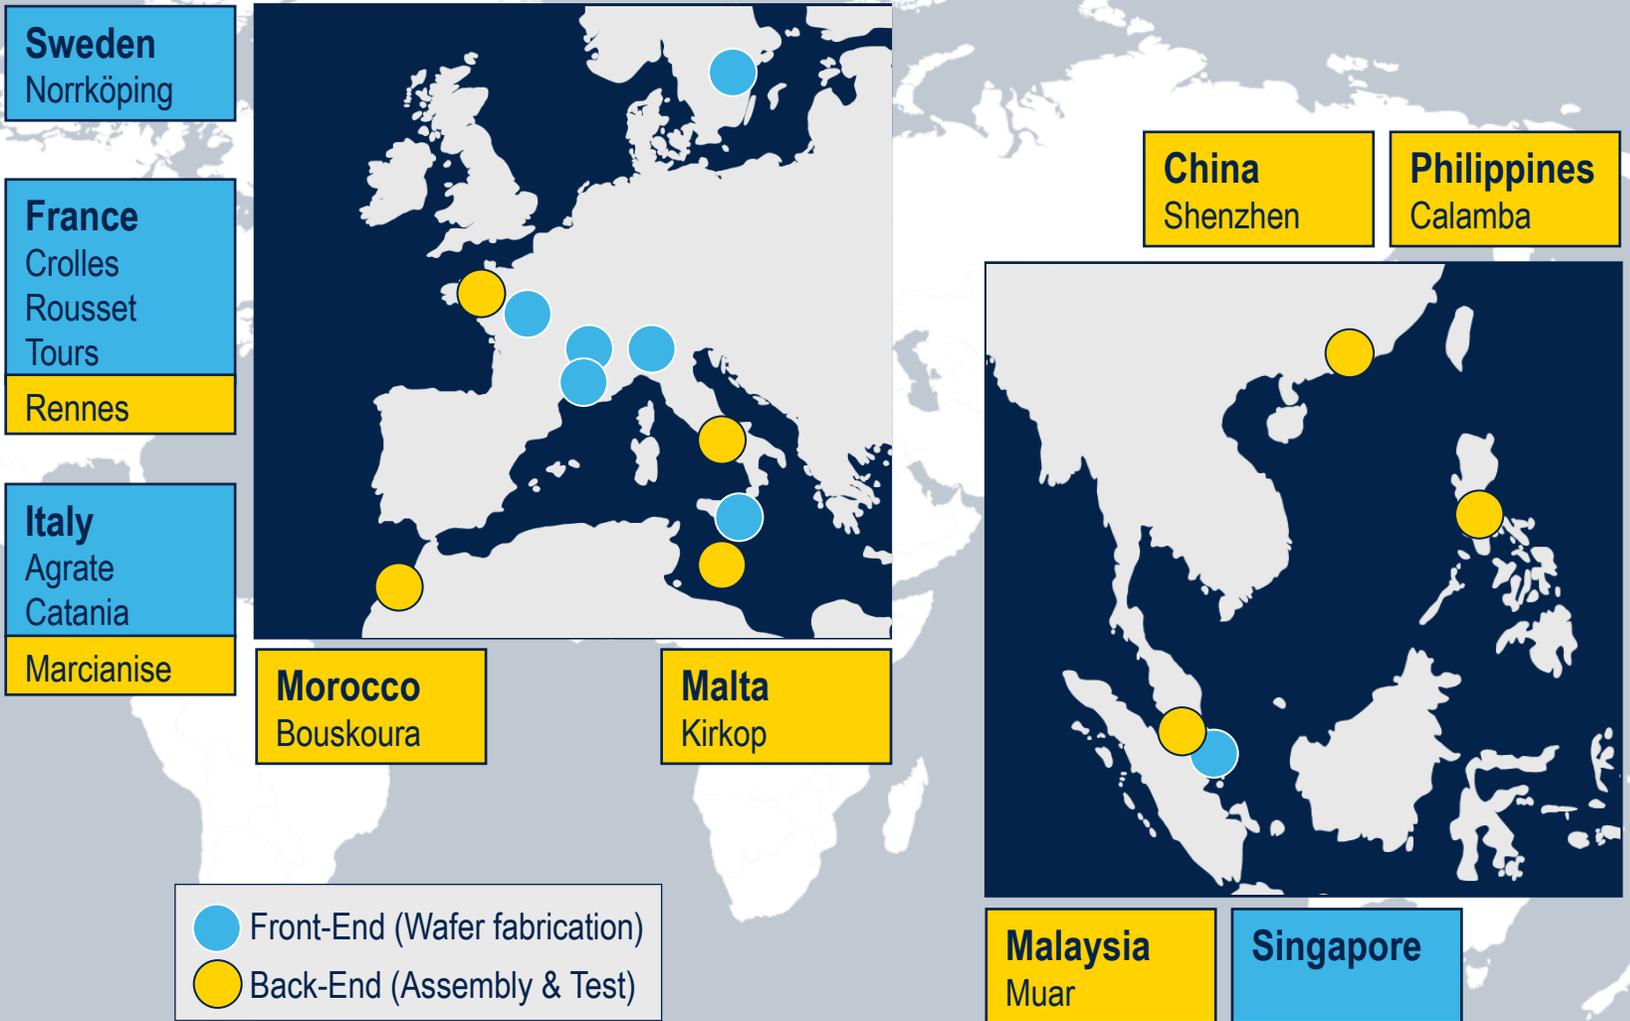

Power ASICs

A broad portfolio of differentiated technologies including BCD, VIPower*, SiC, GaN, and power MOSFET

Manufacturing and R&D

We offer quality, flexibility, and supply security

We are drivers of your innovation

Advanced R&D centers around the world for close collaboration with operations, customers, and partners

~9,000 people working in R&D and product design

~21,000 active and pending patents worldwide

~17% of revenues invested in R&D in 2025

~200 active R&D partnerships

10+ fab labs to drive open innovation

~50 startups actively engaged

Recognized as a top global innovator

Top 100
Global
Innovator
2026

 Clarivate

ST has been recognized by Clarivate as a **Top 100 Global Innovator** for the **fifth consecutive year** and **eighth time** overall

“As the pace of technological change accelerates, we work in open collaboration with customers and partners to develop disruptive semiconductor technologies and solutions in sensing, power and energy, connectivity, data communications, compute and edge AI, helping them turn ambitious ideas into market-defining solutions.”

Alessandro Cremonesi, Chief Innovation Officer

STMicroelectronics recognized as a
Top 100 Global Innovator 2026 by Clarivate

Customers & sales

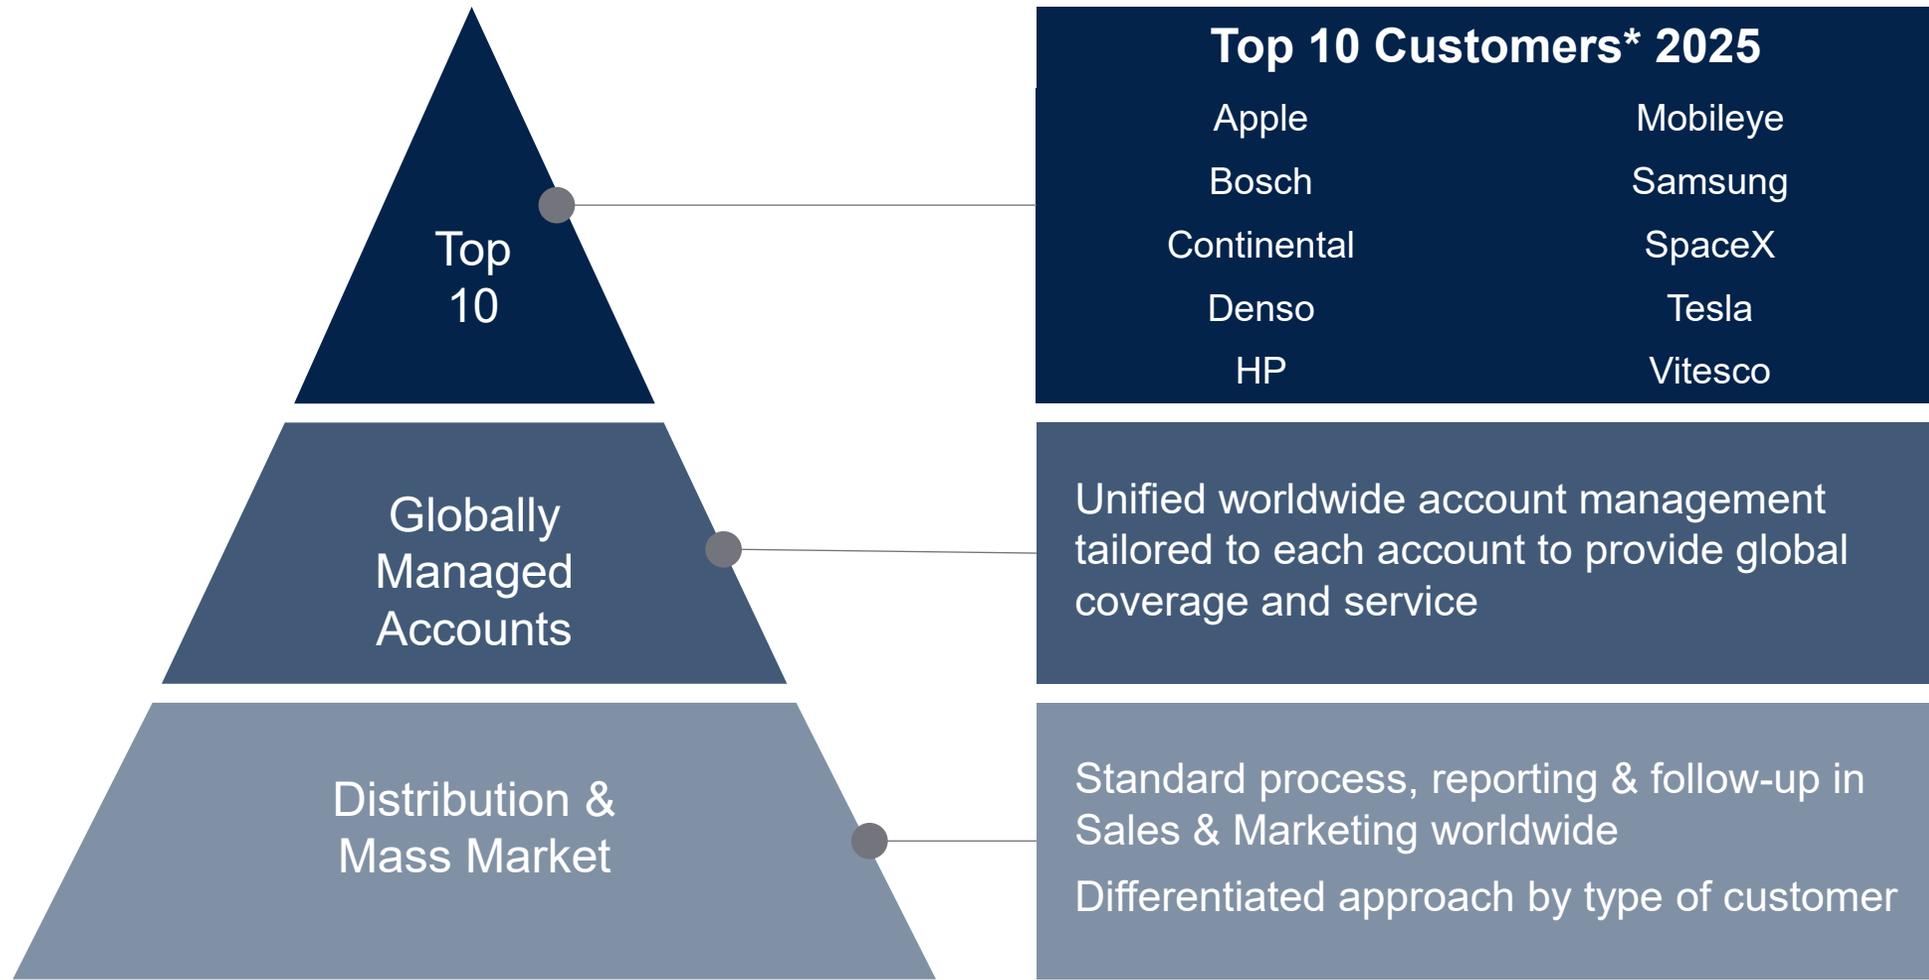

We are partners with our customers worldwide

Over 80 sales offices in 35 countries

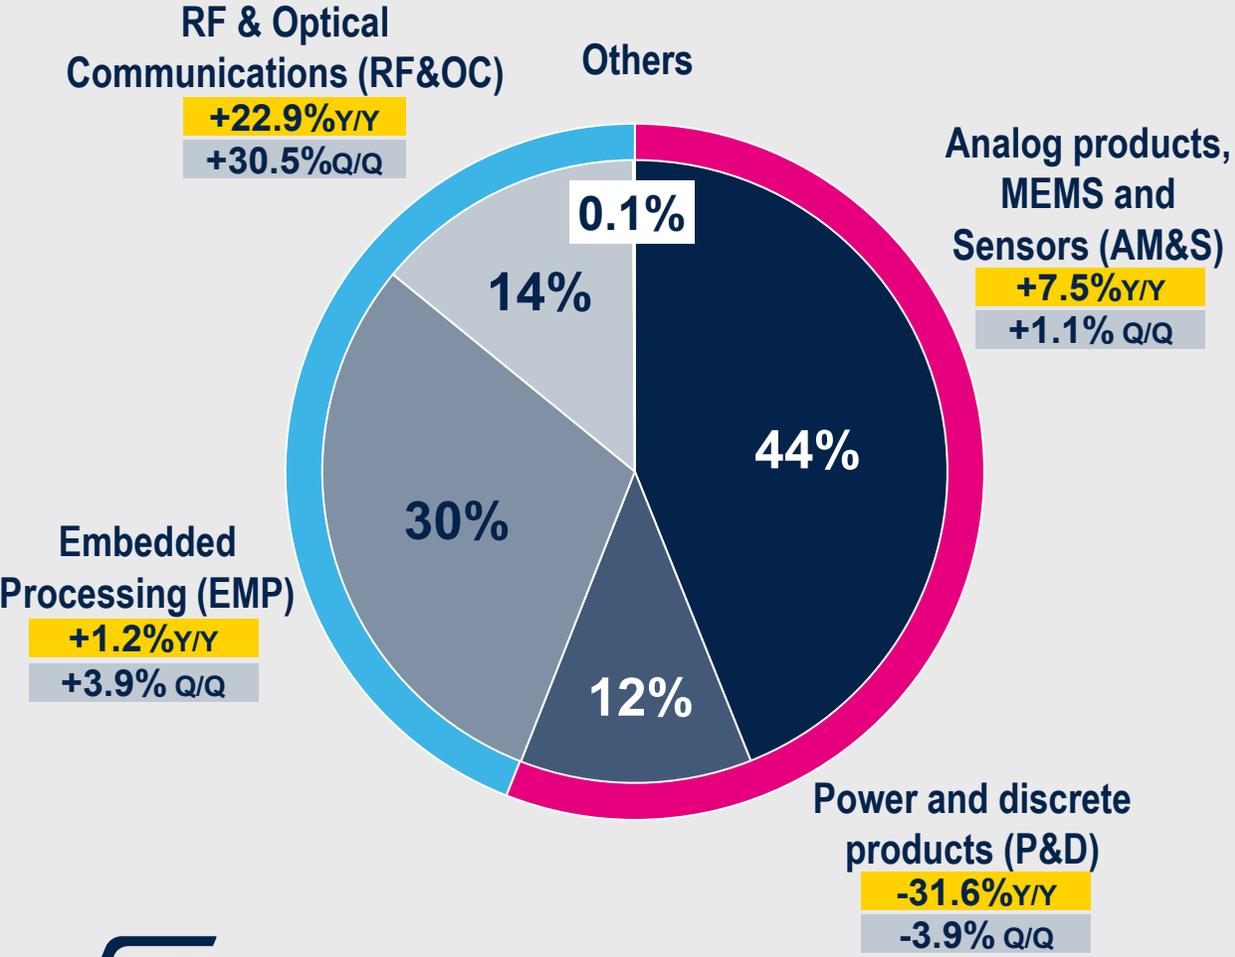

We serve more than 200,000 customers

Our commitment to quality

Quality is embedded in our culture

Our quality culture is driven by a commitment to continuously improve, a prevention mindset and our STRIVE for Excellence values

S	trength
T	eamwork
R	esilience
I	nnovation
V	alue
E	xpertise

Quality is a key business enabler for ST

Our quality vision

Elevate ST quality to the highest levels, positioning it as a valuable asset for our customers

Our quality mission

Ensure ST products meet the highest quality and reliability requirements of customers in the markets we address

Our quality strategy

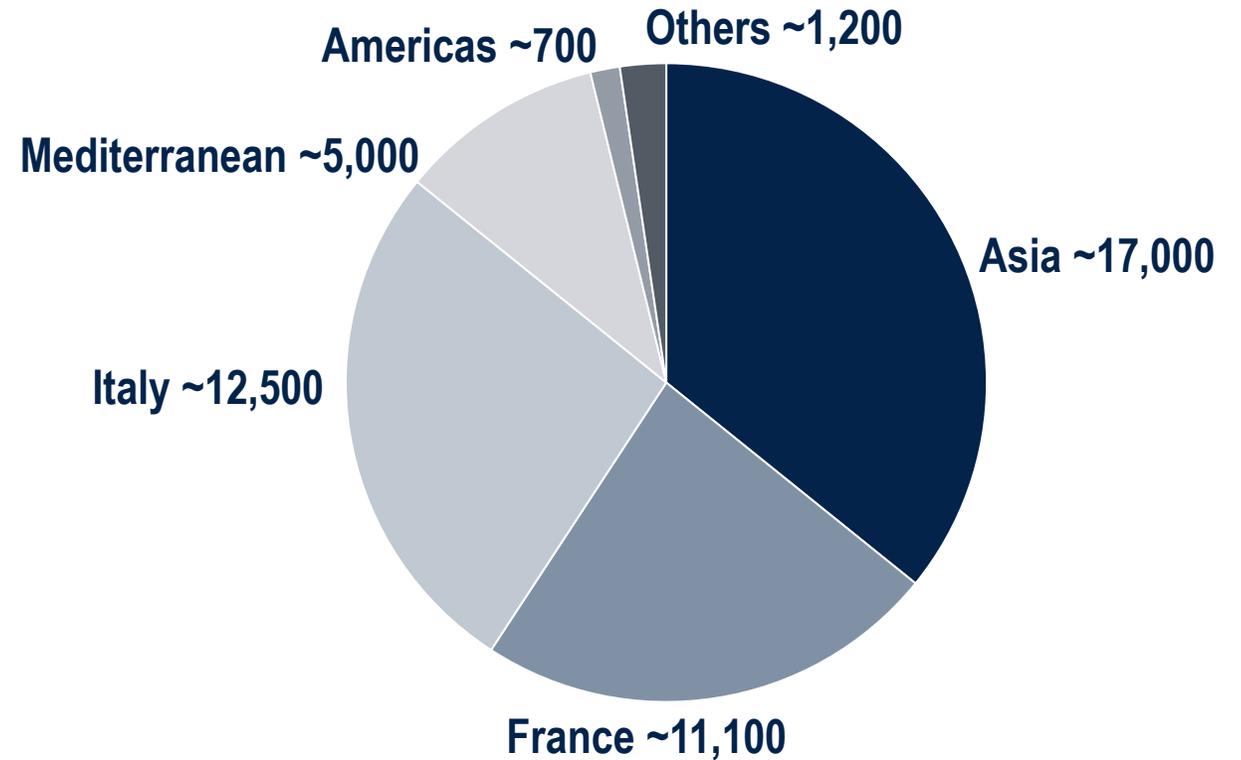

- Deploy a mindset and culture of quality
- Focus on quality performance at our customers
- Innovate for advanced quality and reliability
- Drive structured result-driven improvement programs

Our people

Our technology starts with our people

Manufacturing	~ 63%
Research & Development	~ 19%
Marketing & Sales, Divisional Functions, Administration & General services	~ 18%

ST recognized as a Global Top Employer again in 2026

ST awarded “Top Employer Global” certification for the **second consecutive year**

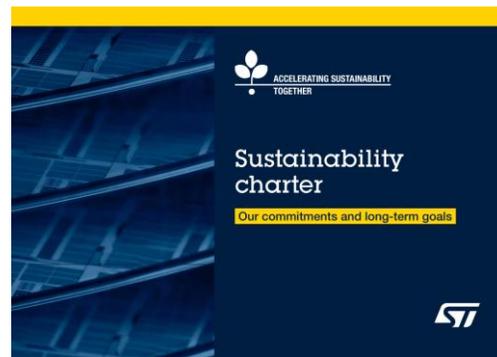

One of **17 companies** in the world to obtain this international certification for 2026

ST entities in **41 countries** certified as Top Employer

Sustainability

Sustainability has been engraved in our business model and culture for over 30 years

1987	Creation of ST. Business conduct & ethics policy	
1993	First environmental policy	
1995	First environmental decalogue	
1997	First environmental report, ISO 14001, EMAS	
2000	Signatory of the UNGC 10 principles	
2001	Creation of ST Foundation	
2002	Establishment of a reforestation program	
2003	OHSAS18001 safety certification (migration to ISO 45001 in 2021)	
2007	Conflict Minerals program	
2011	Sustainable Technology program	
2012	ISO 50001 energy management	
2014	5th Environment, Health & Safety Decalogue	
2016	ISO 22301 Business Continuity 1st certification	
2020	Commitment to be Carbon Neutral by 2027*	
2025	28th year of reporting First integrated report as part of ST's annual report New Sustainability Charter published	

*on scope 1 & 2 and focusing on product transportation, business travel and employee commuting emissions for scope 3

Our approach to sustainability

Sustainable technology

We create technology that contributes to a sustainable world

Designing responsible products and technologies
Managing the life cycle of our products in a sustainable way
Responsible minerals sourcing
Eco-design devices - power-efficient & low-carbon

Sustainable way

We prioritize people

Ensuring people health, safety, & well-being
Role model in labor & human rights
Fostering a diverse & inclusive work environment
Offering great employee experience

We respect the environment

Committing to carbon neutrality*
Leading environmental management system
Reducing water usage & addressing local scarcity risks
Reducing waste & promoting a circular economy

Sustainable company

We generate long-term value for our stakeholders

Embedding risk management
Monitoring and developing the extended supply chain
Promoting STEM in all our ecosystems
Monitoring & transparently reporting our progress

STEM (Science, Technology, Engineering, Mathematics)

*on scope 1 & 2 and focusing on product transportation, business travel and employee commuting emissions for scope 3

Our business model

Management of our impact

Suppliers

We require our suppliers to implement the **Responsible Business Alliance (RBA)** standards and encourage ISO and OHSAS certifications to address ethics, social, environmental, health, and safety risks.

We participate in the **Responsible Minerals Initiative**.

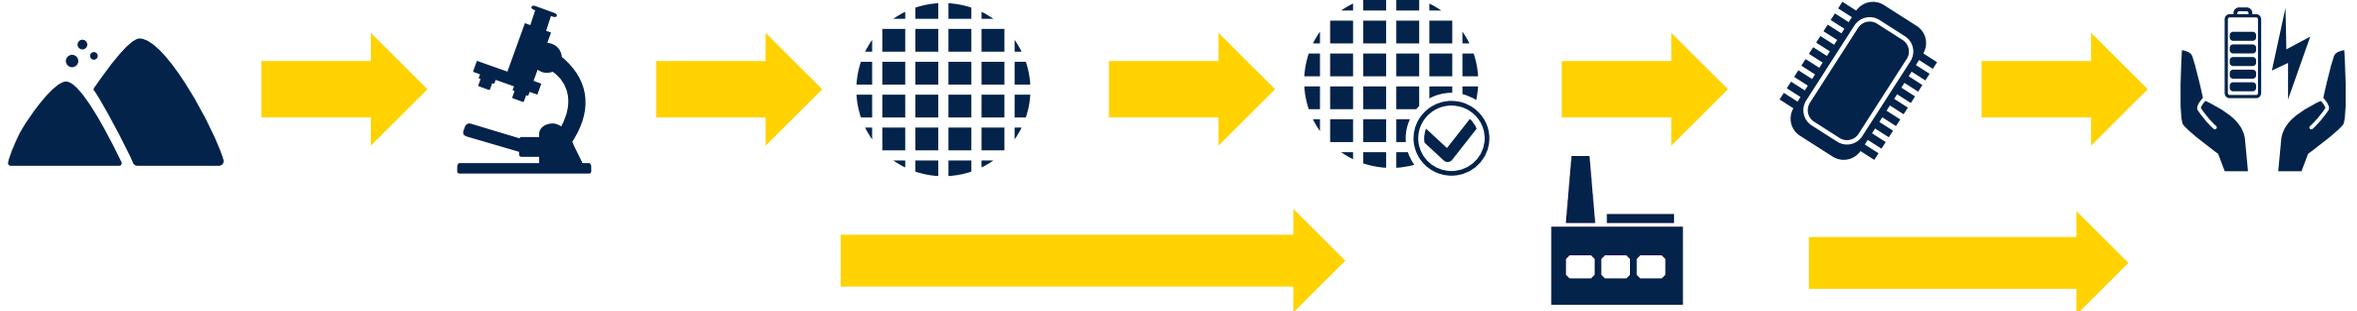

Environment

We deploy programs to reduce our direct and indirect **greenhouse gas emissions** from all our operations, including Perfluorinated Compounds (PFCs), which have a very long atmospheric lifetime and high global warming potential.

We minimize the **environmental, health and safety risks** related to the chemicals and materials used in the manufacturing process, by basing the selection, handling, and substitution on the precautionary principles.

We are continually reducing our **water footprint** through reuse and recycling and all our wastewater is treated before being discharged into the environment.

We reduce, reuse, recycle or recover as much of our **waste** as possible, rather than sending it to incineration or landfill.

People

We ensure the **health and safety** of our employees through advanced management systems and certification.

We implement our **Code of Conduct** and the RBA standards in all our sites to mitigate our **ethics and labor and human rights risks** and carry out regular assessments and audits in all our production sites.

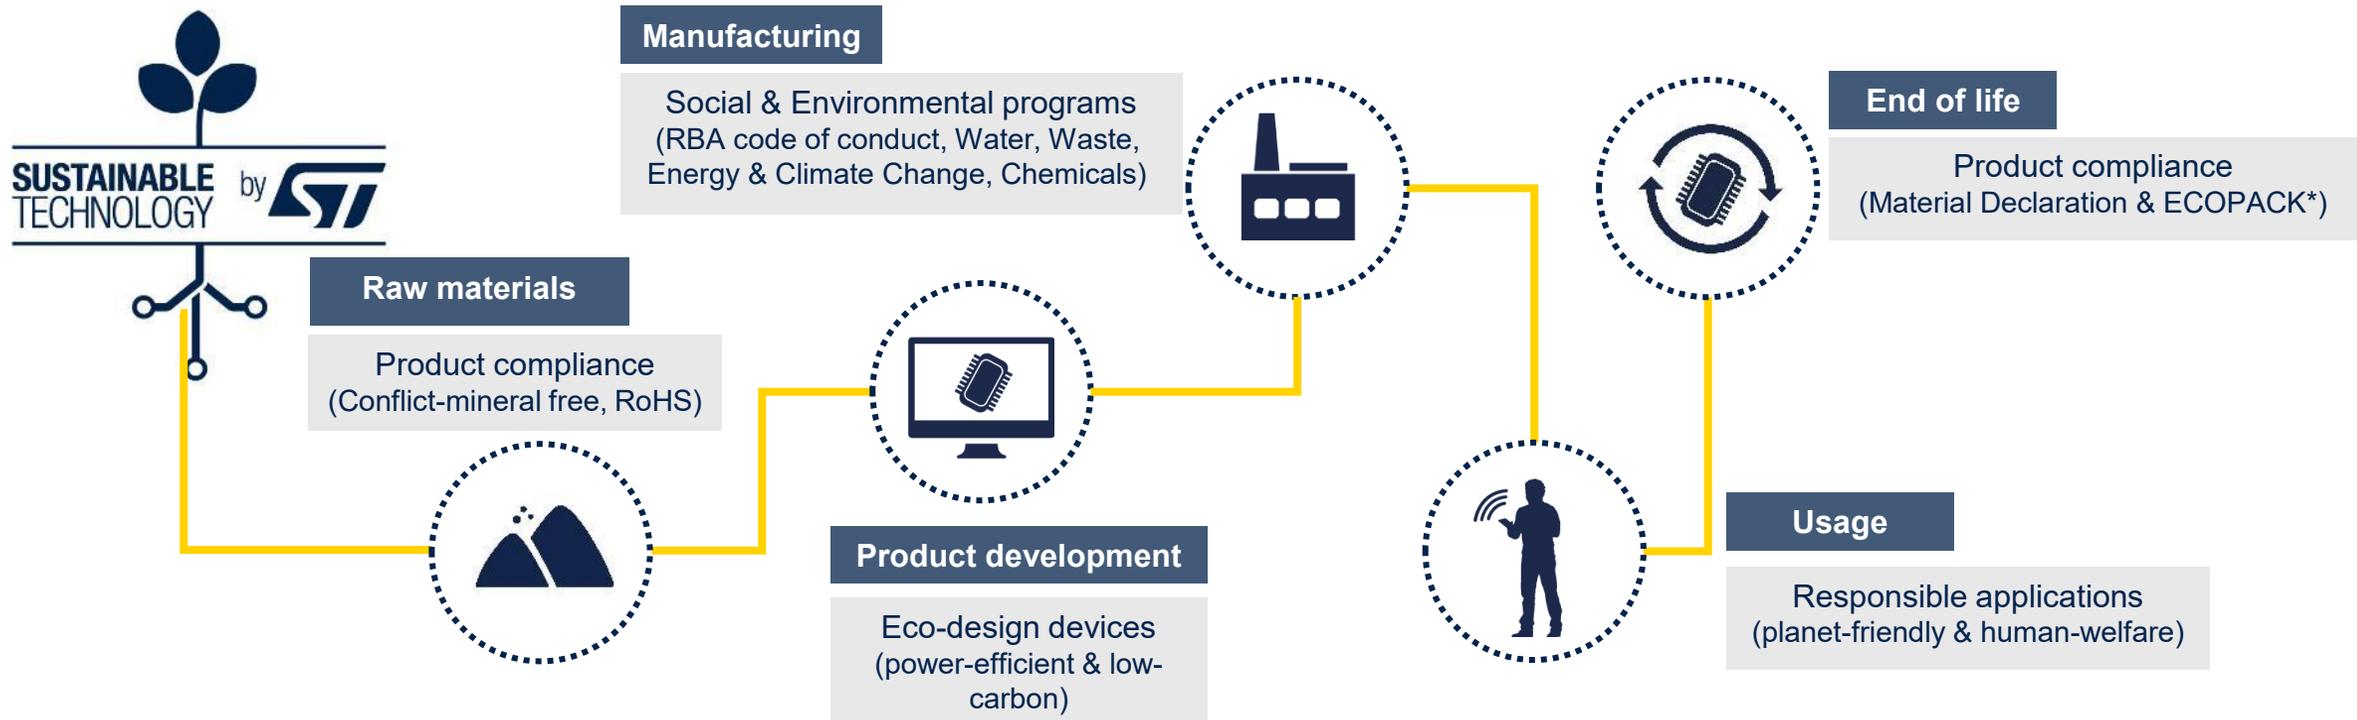

Products

Through our **Sustainable Technology program** we design products systematically taking into consideration the environmental impact of the device during its whole life cycle, including raw materials, transportation, manufacturing, usage and end of life.

Sustainable technology

Our **Sustainable Technology** program aims to develop responsible products which:

- improve our **social and environmental footprint** at every stage of the product life
- have the greatest **positive impact** on the planet and people in the end-application

We will be carbon neutral by our 40th anniversary

Milestones

Compliance with the **1.5°C scenario** by 2025 – recognized by SBTi

Carbon neutral by 2027 (on Scope 1 & 2 and focusing on product transportation, business travel and employee commuting emissions for scope 3)

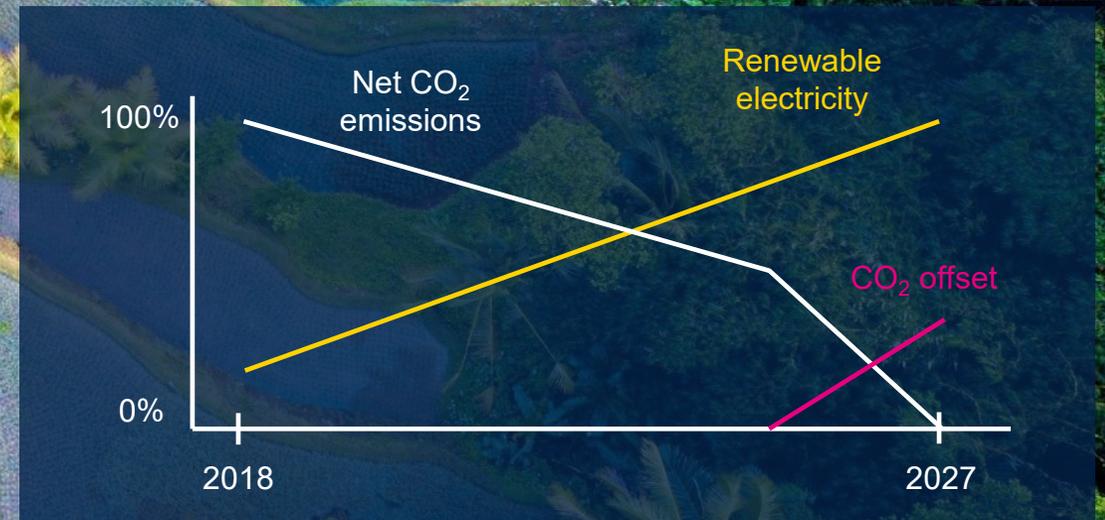

Sourcing **100% renewable electricity** by 2027

Collaborative programs and partnerships for carbon neutrality throughout our ecosystems

In 2024

84% electricity from renewable sources

Sustainability recognition

TIME World's Most Sustainable Companies

Ranked 25th most sustainable company globally and 1st in the Electronics, Hardware and Equipment category

CDP leadership band

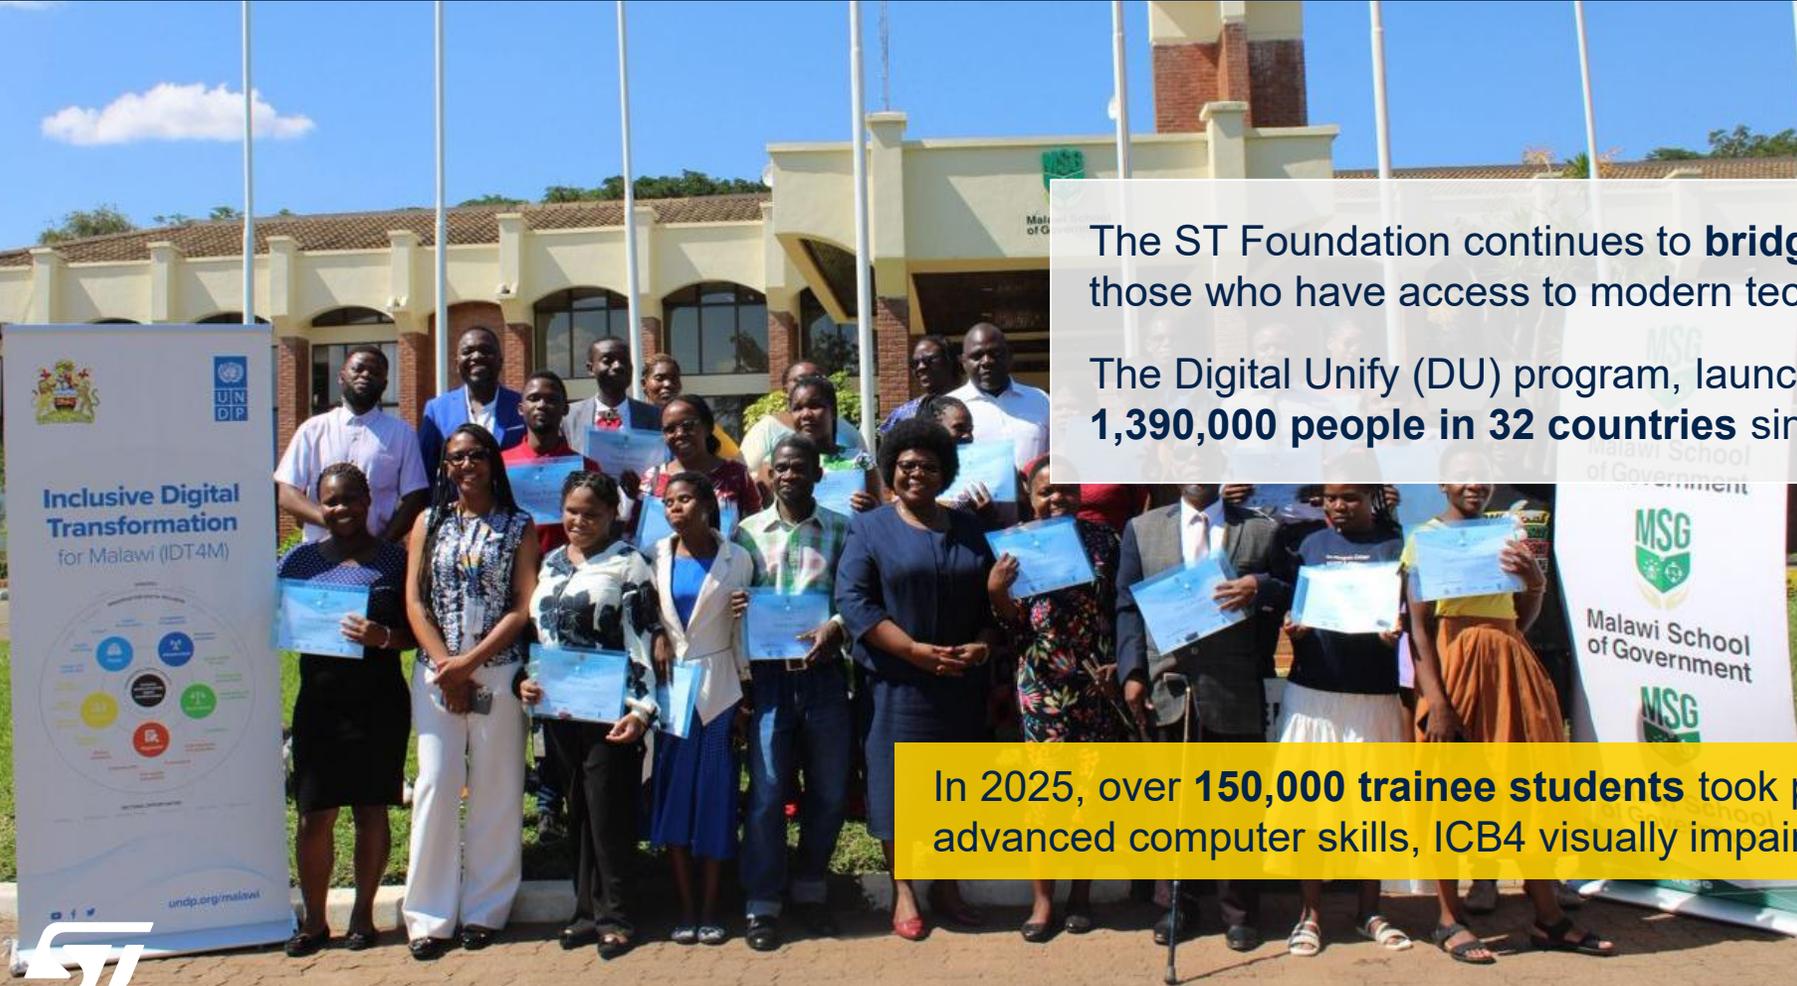

In the CDP leadership band for climate change management (A) and water management (A-)

ST Foundation

ST Foundation's mission is to develop, coordinate, and sponsor projects that employ of modern sciences & latest technology to promote human progress

The ST Foundation continues to **bridge the digital divide** between those who have access to modern technologies and those who do not. The Digital Unify (DU) program, launched in 2003, has trained over **1,390,000 people in 32 countries** since its inception.

In 2025, over **150,000 trainee students** took part in classes on basic and advanced computer skills, ICB4 visually impaired people and 'Tablets for Kids'
