The TDA7269A is a class AB Dual Audio Power amplifier assembled in the Multiwatt package, specifically designed for high-quality sound applications as Hi-Fi music centers and stereo TV sets. It features a wide supply voltage range up to +20V, split supply, high output power of 14+14W at THD = 10%, RL = 8Ω, ±16V, no pop at turn-on/off, mute (pop-free), stand-by feature (low IQ), short circuit protection to GND, and thermal overload protection.

**Description**

The TDA7269A is a class AB Dual Audio Power amplifier assembled in the Multiwatt package, specifically designed for high-quality sound applications as Hi-Fi music centers and stereo TV sets.
