

The leaves

The three leaves represent the three cornerstones on which we build our commitment to create technology and products that promote a more sustainable future.

3 Leaves for 3 pillars :

- People
- Business
- Environment & Operations

SUSTAINABLE TECHNOLOGY by STI

Located as the fertile ground between the leaves and the roots, the Sustainable Technology program underpins our vision, actions and products.

The roots

ST's roots nourish a more sustainable world through a global responsible approach in designing and manufacturing semiconductors, which demonstrates our commitment to the environment and people.
