

## Open-source License Agreements

Some of the former Atollic products are partly based on open-source components. Please contact **ST Support** if you need more information regarding these components or want to receive their source code. The license terms that apply for these components are listed below.

Some of the listed components may not be included in all the different versions of the TrueSTUDIO software products.

The TrueSTUDIO software products may also contain some free or open-source components not listed below; consult the specific TrueSTUDIO software product, the About dialog contains an “Installation Details” button which opens the “Installation Details” dialog. Detailed license information can be found in the Features tab in “Installation Details” dialog.

Eclipse IDE framework <a href="#">Eclipse Public License – v1.0</a>	GNU debugger <a href="#">GNU General Public License 3.0</a>
Eclipse CDT <a href="#">Eclipse Public License – v1.0</a>	GNU libstdc++ <a href="#">GNU C++ Library License</a>

GNU core utilities <a href="#">GNU General Public License 3.0</a>	Wicked shell <a href="#">Eclipse Public License – v1.0</a>

The Licensee has the rights to create proprietary applications and libraries with the TrueSTUDIO software products even if it contains some Third Party Software that is “free software” or “open source software”.

The Third Party Software does not impose any obligation on the Licensee to expose the source code of the Licensees proprietary applications and libraries created with the TrueSTUDIO software products.
