

## STM32WB55 Bluetooth 5 certifications using Qualified Design Listing

As suppliers of Bluetooth Qualified Designs, we provide our customers with the QDIDs of our STM32WB55 qualified products in order for them to successfully complete the Declaration Process of their own product implementations.

As the Bluetooth Special Interest Group (SIG) no longer supports printed certificate documents, it is now recommended to use their [online Search tool](#) to get the QDIDs which also serve as proof of certification.

For your convenience, here are the links to our QDIDs issued as direct results of the Bluetooth SIG online search engine:
