STM32 Open Development Environment: Overview
Sub-1 GHz RF expansion boards

Hardware overview

Hardware description

• The X-NUCLEO-IDS01A4, X-NUCLEO-IDS01A5 are evaluation boards based on the SPIRIT1 RF modules SPSGRF-868 and SPSGRF-915
• The SPIRIT1 module communicates with the STM32 Nucleo developer board host microcontroller though an SPI link available on the Arduino UNO R3 connector.

Key products on board

SPSGRF
SPIRIT1 (Low data-rate, low-power sub-1GHz transceiver) module

M95640-RMC6TG
64-Kbit serial SPI bus EEPROM

(*) Identification of the operating frequency of the X-NUCLEO-IDS01Ax (x=4 or 5) is performed through two resistors (R14 and R15).

X-NUCLEO-IDS01A4
X-NUCLEO-IDS01A5
**X-CUBE-SUBG1 software description**

- X-CUBE-SUBG1 is an expansion software package for STM32Cube. It provides drivers running on the STM32 MCU for the SPIRIT1 device. It is built on top of the STM32Cube software technology, which eases portability across different STM32 microcontrollers.

- Implementation examples are available for the Sub-1 GHz RF expansion board (X-NUCLEO-IDS01A4, X-NUCLEO-IDS01A5) plugged on top of an STM32 Nucleo board (NUCLEO-F401RE or NUCLEO-L053R8 or NUCLEO-L152RE).

**Key features**

- Point-to-point communication firmware example to build applications using the SPIRIT1 device

- Middleware application example such as wM-Bus available for X-NUCLEO-IDS01A4 (868 MHz)

- wM-Bus physical and link library in binary format.

- Sample applications that the developer can use to start experimenting with the code

- Easy portability across different MCU families thanks to STM32Cube

- Free user-friendly license terms

STM32 Open Development Environment: Overview
Setup & demo examples
Hardware prerequisites

- STM32 Nucleo SPIRIT1 expansion board (X-NUCLEO-IDS01A4, X-NUCLEO-IDS01A5)
- STM32 Nucleo development board (NUCLEO-F401RE, NUCLEO-L053R8, NUCLEO-L152RE)
- For point-to-point demo: 2 sets of nodes X-NUCLEO-IDS01A4 and STM32 Nucleo (NUCLEO-F401RE or NUCLEO-L053R8 or NUCLEO-L152RE)
- Computer for running the graphical user interface of wM-Bus for testing the wM-Bus firmware example.
  - Only one set of STM32 Nucleo board (NUCLEO-F401RE or NUCLEO-L053R8 or NUCLEO-L152RE) with SPIRIT1 expansion board (X-NUCLEO-IDS01A4) is required
  - In the wM-Bus demo, the node acts as “meter”
  - For the Concentrator device, any of the STEVAL boards listed in the enclosed table can be used
  - The concentrator firmware is available in SPIRIT1 SDK STSW-CONNECT009

<table>

Setup & demo examples
Software prerequisites

• **STSW-LINK008**
  • ST-LINK/V2-1 USB driver

• **STSW-LINK007**
  • ST-LINK/V2-1 firmware upgrade

• **X-CUBE-SUBG1**
  • Copy the .zip file content into a folder on your PC. The package contains source code examples (Keil, IAR, SW4STM32) based on NUCLEO-F401RE, NUCLEO-L053R8, or NUCLEO-L152RE
Sub-1 GHz RF expansion boards
Start coding in just a few minutes with X-CUBE-SUBG1

1. Go to www.st.com/x-nucleo

2. Select X-NUCLEO-IDS01A4, X-NUCLEO-IDS01A5

3. Download & unpack X-CUBE-SUBG1

4. Download & install STM32 Nucleo ST-LINK/V2-1 USB driver

X-CUBE-SUBG1 package
- Generic Nucleo docs & SPIRIT1 porting
- SPIRIT1 SPI driver
- wM-Bus middleware stack
- Application examples

5. Open project example
   - P2P Demo
   - wMbusStandalone

6. Modify and build application

Open STM32 Tools
Sub-1 GHz RF expansion boards
Point-to-point demo application

1. User presses button

2. The node sends the command to the other node

3. The LED blinks on the Receiving node

4. Acknowledgement of command

5. The LED blinks when ACK is received

Press the User button on the STM32 Nucleo

LED blinks

ACK sent

LED blinks

Press User Switch B1 on STM32 Nucleo

LED blinks

ACK sent
Sub-1 GHz RF expansion boards
Evaluate SPIRIT1 using a GUI

1. Program the wM-Bus firmware to STM32 Nucleo equipped with X-NUCLEO-IDS01A4

2. Program the concentrator firmware on one of the boards suggested for running the concentrator firmware (see the hardware pre-requisites slide)

3. Run the wM-Bus graphical user interface on a PC connected to STEVAL-IKR001Vx

## STM32 Open Development Environment

### Software components

- **STM32Cube software (CUBE)** - A set of free tools and embedded software bricks to enable fast and easy development on the STM32, including a Hardware Abstraction Layer and middleware bricks.

- **STM32Cube expansion software (X-CUBE)** - Expansion software provided free for use with the STM32 Nucleo expansion board and fully compatible with the STM32Cube software framework. It provides abstracted access to expansion board functionality through high-level APIs and sample applications.

### Compatibility with multiple Development Environments

The STM32 Open Development Environment is compatible with a number of IDEs including IAR EWARM, Keil MDK, and GCC-based environments. Users can choose from three IDEs from leading vendors, which are free of charge and deployed in close cooperation with ST. These include Eclipse-based IDEs such as Ac6 System Workbench for STM32 and the MDK-ARM environment.
