

ST IGBT Finder

The new app for Android™ and iOS™

Get the right IGBT for your application with a touch of your screen

ST-IGBT-FINDER is the fast and smart way to explore the ST IGBT product portfolio using your smartphone or tablet.

Use the Parametric Search engine to rapidly identify the IGBT that best fits your application.

Series search engine displays an overview of the IGBT series in trench field-stop (TFS) and planar punch-through (PT) designed to address specific applications for both industrial and automotive environment. You can also find your product quickly thanks to the auto-completing Part Number Search engine.
