

STM32G0 SERIES

32-bit Mainstream MCUs

Entry-level Arm® Cortex-M0+ MCUs - Efficiency at its best

The STM32G0 Series is not simply another Arm® Cortex®-M0+ microcontroller. It is setting a new definition of what an efficient microcontroller must offer. This is all about best optimization, down to each and every detail, to offer the best value for money and allow you to achieve your goals with the minimum BOM cost and the maximum flexibility for upgrades. The STM32G0x0 Value Line embeds an accurate internal clock allowing further cost saving, and makes no compromise on what matters. The STM32G0x1 line provides upgraded features in analog, timer resolution up to 2xfcpu (7.8ns) and is IoT ready with enhanced security features. It supports the latest USB type-C specification including Power Delivery 3.0.
