ST Sensors & Embedded Tech

Embedded & Connectivity Technologies

Loris Valenti

VP Microcontrollers and Digital Products Group - AME

Loris.Valenti@st.com

Where you find ST embedded products

Making **homes & cities** smarter, for better living, higher security, and to get more from available resources

Enabling the evolution of **industry** towards smarter, safer and more efficient factories and workplaces

Making **driving** safer, greener and more connected

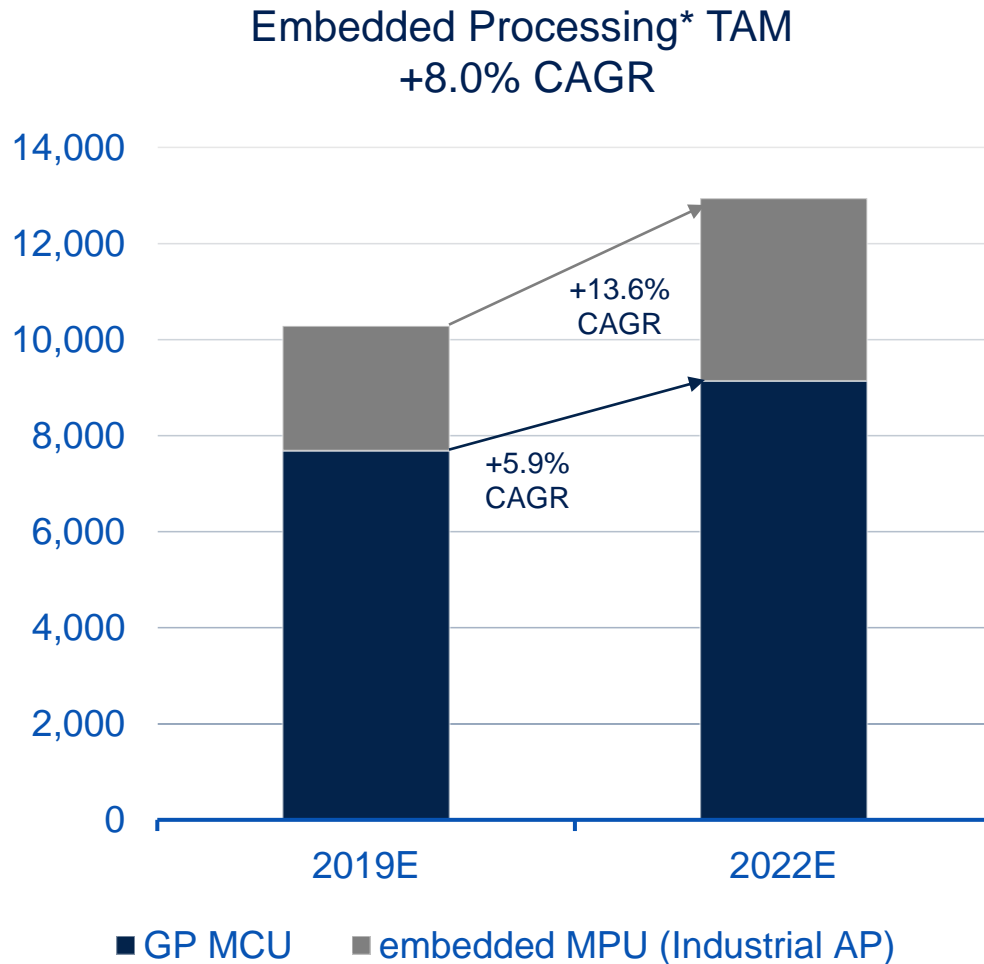

life.augmented

Making everyday **things** smarter, connected and more aware of their surroundings

Embedded Processing Market Trend

* Excluding Automotive MCUs
Source: WSTS August 2019

Growth Driver Industrial

- The brain of a large variety of applications
- IoT pervasion accelerated by 5G deployment
- Artificial Intelligence disruption at the edge
- New applications enabled by secure IoT

- Industrial Robotics / Factory Automation
- Medical Diagnostic and imaging
- Drones
- Point of Sales

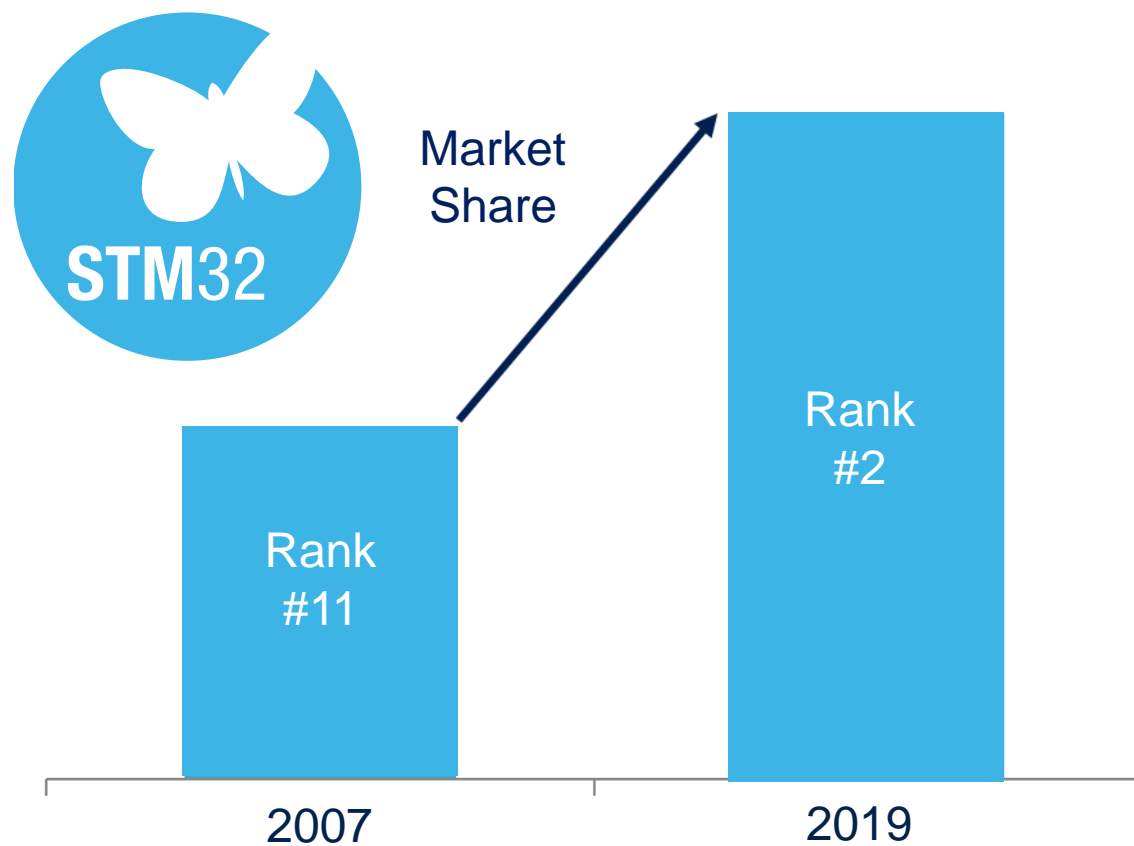

- Appliances
- Wellness & fitness
- Additive manufacturing
- Portable Point of Sales
- Industrial & Power tools
- Smart Metering
- Personal healthcare
- Smart Farming

ST & Embedded Processing

ST Embedded Processing Ranking

STM32 Microcontroller family

- Based on single or dual ARM Cortex M core
- Broadest global portfolio
- > 1600 products available
- Serving more than 60,000 customers worldwide
- More than 4 Billion units shipped from 2007
- Complete, robust & coherent ecosystem

STM32MP Microprocessor family

- 1st product launched 1Q19
- Multi-core Arm Cortex-A cores
- Very high performance
- Differentiated ecosystem

STM32 Product Family

Strengthening Embedded Processing

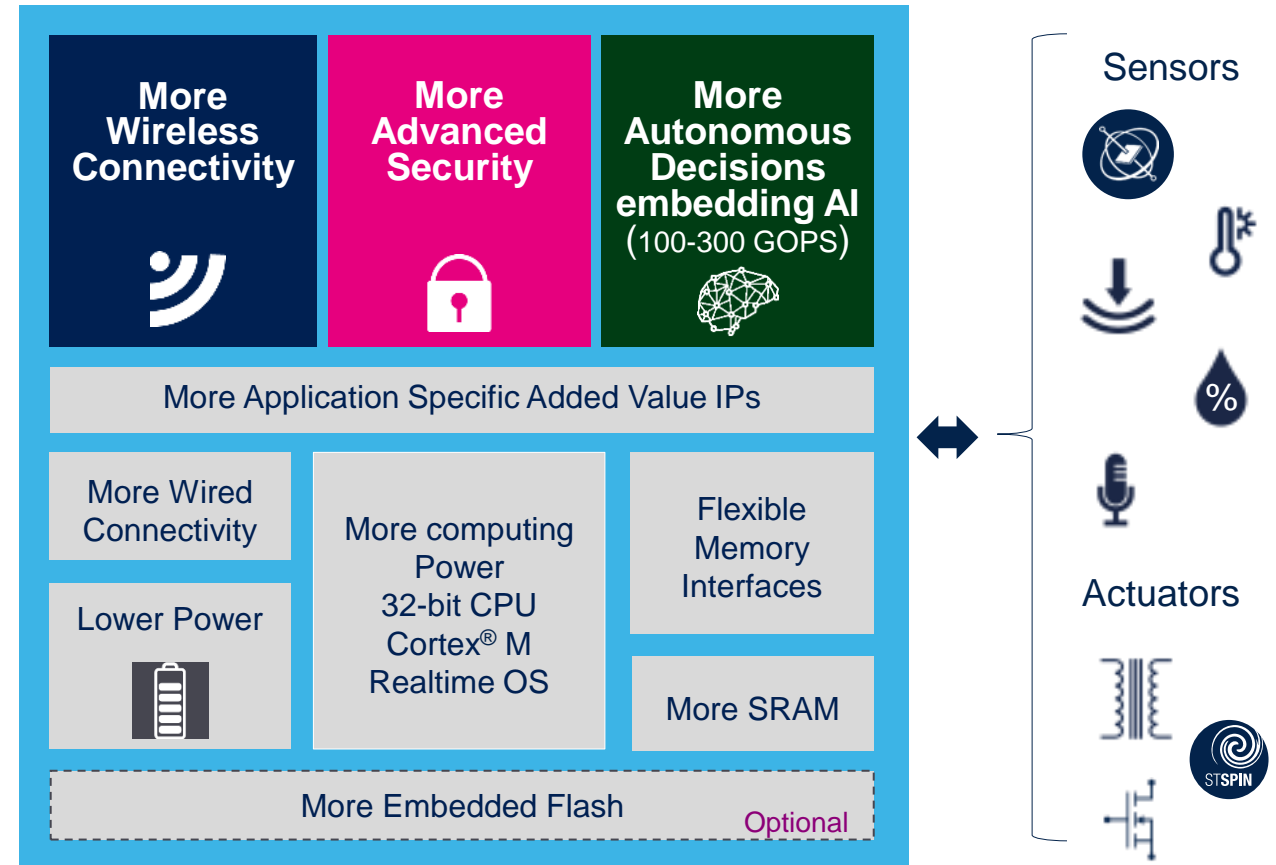

Market growth drivers

- MCUs embedding wireless connectivity capability well adapted to the targeted applications
- Advanced security
- AI capabilities
- Robust & Comprehensive Ecosystem to accelerate applications/system developments

Focused verticals & technologies

- STM32 products supporting system solutions and continuous expansion
- Graphics
- Connectivity
- Security
- Wireless
- Motor Control
- Digital Power
- Audio

Communication Technologies - Overview

Typical objects in the 2.4 GHz space ...

Bluetooth / ANT (TBC)
Point-to-point communication with
smartphones and other wireless devices
Battery powered devices

Mesh BLE / Zigbee / Thread ...
Home automation with Mesh network need

LPWAN technology selection

Uses cases will help to identify the most appropriated technology

Agriculture

Low value object tracking

Smart Metering

Smart grid

Smart watch

Lighting

Utilities Maintenance

Smart parking

Smart Building

High value object tracking

Connected Cars

Data rate < 100 kbps (*or more)

Data rate > 100 kbps

Unlicensed

Licensed

Solutions for NFC / RFID Tags and Readers

ST25
Simply
More Connected

Embedded and Connectivity Technologies

More Computing Power

- Powerful Cortex MCU & MPU
- Rich user interface
- Industrial specific Peripherals

More Artificial Intelligence

- Artificial Intelligence **at the edge**
- Real time response, data privacy
- Predictive maintenance

More Connectivity

- Industrial Ethernet
- NFC, BLE, Wi-Fi, UWB
- LPWAN, CAT-M/NB-IOT 4G to 5G

More Security

- Ensure system integrity
- Secure communication
- Authentication and privacy of data

Support Design with Focus on **Safety**

Broader & more dedicated **Ecosystems**

Sensors and Embedded Tech

Afternoon sessions

Embedded and Connectivity Technologies		
	Time (ET)	Session Title
	2:00 PM	Welcome
Embedded	2:10 PM	Bringing AI to the Edge
	2:30 PM	Enhancing the User Experience with Graphics
	2:50 PM	Securing Connected Devices
Connectivity	3:10 PM	Get Connected! Explore Bluetooth, 802.15.4 and SubGHz System On Chip Solutions
	3:30 PM	Contact-Less Connectivity NFC is in your phone and your watch - Where else?
	3:50 PM	Closing Remarks

Thank you
