

## STMicroelectronics Public Disclosure Statement Pursuant to California Assembly Bill No. 1305

Section 44475.2 of the California Assembly Bill No. 1305, the Voluntary Carbon Market Disclosure Act ("VCMDA"), requires certain disclosures for entities that operate in California and that make claims regarding the achievement of net zero emissions, claims that the entity, a related or affiliated entity, or a product is carbon neutral, or other claims implying the entity, related or affiliated entity, or product does not add net carbon dioxide or greenhouse gases ("GHG"s) to the climate or has made significant reductions to its carbon dioxide or GHG emissions.

STMicroelectronics N.V. ("ST") makes emissions-related claims in its Sustainability Statement included in Section 3.4 of ST's 2024 Dutch Annual Report (the "DAR") found [here](#) on st.com. The following disclosure statement is a guide to where in Section 3.4 of the DAR the disclosures that satisfy the requirements of Section 44475.2 of the VCMDA are located.

### **1. Disclosures for Entity Level Claims**

ST's net zero, carbon neutral, and significant emissions reduction targets and claims can be found in Section 3.4.3.C of the DAR, titled "Actions, targets and resources in relation to climate change policies" (pp. 102-107 [here](#)). Additional information on ST's emissions-related targets can be found in the table titled "Climate related IROs" in Section 3.4.3.1 of the DAR (pp. 95-99 [here](#)).

Information on how ST measures its GHG emissions and determines the accuracy of its claims can be found in Section 3.4.3.D of the DAR, titled "Metrics related to climate change mitigation and adaptation" (pp. 108-113 [here](#)).

Information on how ST measures interim progress towards these targets, including its science-based targets and sector methodology, can also be found in Sections 3.4.3.C and 3.4.3.D of the DAR (pp. 102-103 [here](#) and 108-113 [here](#)).

EY Accountants B.V. ("EY") has provided limited assurance of ST's Sustainability Statement. EY's limited assurance report can be found in the DAR (pp. 388-393 [here](#)).

ST reviews its GHG emissions reduction goals on an ongoing basis, and the goals described in the DAR are subject to change.

### **2. Disclosures for Product Level Claims**

ST made no product level claims that trigger the disclosure requirements of Section 44475.2 of the VCMDA subsequent to the issuance of its prior California Assembly Bill No. 1305 Public Disclosure Statement dated January 1, 2025.

### **Forward-Looking Information**

Some of the statements contained in this California Assembly Bill No. 1305 Public Disclosure Statement, including statements regarding ST's GHG emissions reduction goals and renewable electricity sourcing goals, and statements regarding the performance of products described herein in terms of electricity consumption and carbon emissions reductions, are statements of future expectations and other forward-looking statements (within the meaning of Section 27A of the Securities Act of 1933 or Section 21E of the Securities Exchange Act of 1934, each as amended) that are based on management's current views and assumptions, and are conditioned upon and also involve known and unknown risks and uncertainties that could cause ST to meet or fail to meet such goals, or its products to achieve or fail to achieve such electricity consumption and carbon emissions reductions, due to, among other factors:

- changes in global trade policies, including the adoption and expansion of tariffs and trade barriers, that could affect the macro-economic environment and adversely impact the demand for our products;
- uncertain macro-economic and industry trends (such as inflation and fluctuations in supply chains), which may impact production capacity and end-market demand for our products;
- customer demand that differs from projections which may require us to undertake transformation measures that may not be successful in realizing the expected benefits in full or at all;
- the ability to design, manufacture and sell innovative products in a rapidly changing technological environment;
- changes in economic, social, public health, labor, political, or infrastructure conditions in the locations where we, our customers, or our suppliers operate, including as a result of macroeconomic or regional events, geopolitical and military conflicts, social unrest, labor actions, or terrorist activities;
- unanticipated events or circumstances, which may impact our ability to execute our plans and/or meet the objectives of our R&D and manufacturing programs, which benefit from public funding;
- financial difficulties with any of our major distributors or significant curtailment of purchases by key customers;
- the loading, product mix, and manufacturing performance of our production facilities and/or our required volume to fulfill capacity reserved with suppliers or third-party manufacturing providers;
- availability and costs of equipment, raw materials, utilities, third-party manufacturing services and technology, or other supplies required by our operations (including increasing costs resulting from inflation);
- the functionalities and performance of our IT systems, which are subject to cybersecurity threats and which support our critical operational activities including manufacturing, finance and sales, and any breaches of our IT systems or those of our customers, suppliers, partners and providers of third-party licensed technology;
- theft, loss, or misuse of personal data about our employees, customers, or other third parties, and breaches of data privacy legislation;
- the impact of intellectual property ("IP") claims by our competitors or other third parties, and our ability to obtain required licenses on reasonable terms and conditions;
- changes in our overall tax position as a result of changes in tax rules, new or revised legislation, the outcome of tax audits or changes in international tax treaties which may

impact our results of operations as well as our ability to accurately estimate tax credits, benefits, deductions and provisions and to realize deferred tax assets;

- variations in the foreign exchange markets and, more particularly, the U.S. dollar exchange rate as compared to the Euro and the other major currencies we use for our operations;
- the outcome of ongoing litigation as well as the impact of any new litigation to which we may become a defendant;
- product liability or warranty claims, claims based on epidemic or delivery failure, or other claims relating to our products, or recalls by our customers for products containing our parts;
- natural events such as severe weather, earthquakes, tsunamis, volcano eruptions or other acts of nature, the effects of climate change, health risks and epidemics or pandemics in locations where we, our customers or our suppliers operate;
- increased regulation and initiatives in our industry, including those concerning climate change and sustainability matters and our goal to become carbon neutral in all direct and indirect emissions (scopes 1 and 2), product transportation, business travel, and employee commuting emissions (our scope 3 focus), and to achieve our 100% renewable electricity sourcing goal by the end of 2027;
- epidemics or pandemics, which may negatively impact the global economy in a significant manner for an extended period of time, and could also materially adversely affect our business and operating results;
- industry changes resulting from vertical and horizontal consolidation among our suppliers, competitors, and customers;
- the ability to successfully ramp up new programs that could be impacted by factors beyond our control, including the availability of critical third-party components and performance of subcontractors in line with our expectations; and
- individual customer use of certain products, which may differ from the anticipated uses of such products and result in differences in performance, including energy consumption, may lead to a failure to achieve our disclosed emission-reduction goals, adverse legal action or additional research costs.

Such forward-looking statements, including statements regarding goals and products, are subject to various risks and uncertainties, which may cause actual emissions, results and performance of our business and products to differ materially and adversely from the forward-looking statements.

November, 2025.
