

Global Environmental Policy

STMicroelectronics recognizes the importance of conducting business and managing environmental issues in a responsible manner to ensure long-term sustainability.

We aim to respect the planet by minimizing the environmental impact of our activities and through the products we develop.

Environmental responsibility is integral to STMicroelectronics and is consistently integrated into the Company activities, as evidenced through the following commitments:

- Continually engage with our stakeholders and conduct an annual stakeholder consultation. Identify material impacts, risks and opportunities on relevant sustainability matters, including environmental matters, through a double materiality assessment.
- Strive to reduce the consumption of natural resources, prevent pollution, reduce waste, maximize recycling and circular economy, protect biodiversity, minimize the impact of chemical substances on people and the environment.
- Drive actions towards our disclosed sustainability commitments & goals related to protecting the environment.
- Manage our water use responsibly and sustainably, minimizing our impact on water resources, as described in the Global Water Policy.
- Minimize our direct and upstream greenhouse gas (GHG) emissions.
- Continuously manage energy consumption, improve energy efficiency, and source renewable energy.
- Develop technologies and products that enable climate transition applications or that substantially reduce GHG emissions throughout their entire life cycle.
- Incorporate environmental criteria into all stages of our product life cycle through our product stewardship program.
- Define and implement climate adaptation plans addressing relevant climate-related risks.
- Maintain an environmental management system based on standards and best practices throughout the company.
- Run robust internal and external controls and audits to ensure that environmental procedures are carried out and to identify and prioritize areas for improvement.
- Maintain relevant environmental certifications for all our manufacturing and large Research & Development sites worldwide.
- Comply with environmental regulations & other requirements globally and locally.
- Pursue continuous improvement in our environmental performance.
- Provide appropriate training to all our employees and provide all necessary information to our stakeholders.
- Develop long-term partnerships with suppliers committed to responsible environmental standards and practices.
- Promote environmental responsibility among employees.
- Transparently communicate STMicroelectronics environmental policies, practices, and impact to stakeholders.
