Biography

GUIDO LOMAZZI
Executive Vice President, Global Supply Chain Organization
STMicroelectronics

Guido Lomazzi is STMicroelectronics' Executive Vice President, managing the Company's Global Supply Chain Organization since January 2026.

Lomazzi spent his entire career in the semiconductor industry: he started in ST in 1999, then moved to Numonyx and afterwards to Micron, where he held a leadership position in supply chain, before rejoining ST in 2011. Lomazzi has held various senior-management roles, spanning Product Development for memory programs, Program Management for strategic alliances, Quality with focus on manufacturing and supply chain, Back-End manufacturing including planning, industrial engineering, and Industry 4.0. He was in charge of setting up the new central supply chain of ST in 2020-2023. Prior to his current role, Lomazzi managed ST's manufacturing outsourcing operations, responsible for foundries and Outsourced Semiconductor Assembly and Test (OSAT).

Lomazzi holds several patents in semiconductor product design.

Guido Lomazzi was born in Milan, Italy, in 1974, and graduated cum laude in Physics from the University of Milan in 1998.
