MARCELLO SAN BIAGIO
Executive Vice President, Analog Sub-Group
Analog, Power & Discrete, MEMS and Sensors Group
STMicroelectronics

Marcello San Biagio is STMicroelectronics' Executive Vice President, managing the Company's Analog Sub-Group since January 2026.

During his career at ST, San Biagio has progressed through various technical and business roles, from marketing to business leadership, and general management across Analog, Power Management, and RF businesses.

He joined ST in 1994 as a Product Engineer for Analog ICs before moving to an application engineering role for Analog and Power products in 1997. In 2010, San Biagio led the Low Power RF Business Unit. In 2014, he was appointed Strategic Marketing Director of the Industrial and Power Conversion Division. San Biagio moved to become General Manager of ST's General Purpose Analog and RF Division in 2019, and was promoted to Group Vice President in 2022, responsible for the General Purpose and Custom Analog Division.

Marcello San Biagio was born in Palermo, Italy, in 1969, and graduated with a degree in Electronic Engineering from the University of Catania in 1994.
