

## Drone remote controller app for Android

Data brief

### Features

- Easy access to pilot settings and flight parameters
- Based on BlueST-SDK library available on GitHub
- Automatic detection of the STEVAL-FCU001V1 via BLE
- Complete source code available on GitHub

### Description

The ST AppDrone is designed for the [STEVAL-FCU001V1](#) evaluation board.

It is available for Android™ and acts as a drone remote controller via BLE using the BlueST protocol.

AppDrone provides an easy-to-use interface to make piloting easier for beginners.

After turning the STEVAL-FCU001V1 evaluation board on, you must activate Bluetooth on your smartphone or tablet and open the application: AppDrone automatically detects and displays visible boards. You should select the preferred one to start the connection.

From the application home screen, you can easily access your settings for piloting as well as some flight parameters.
