

## Software package with graphical user interface (GUI) and control firmware for evaluation boards featuring VNF9D5F and VNF9Q20F

### Features

- Complete graphical user interface (GUI) for all eFuse monolithic device boards
- Control firmware, included in the software package, for evaluation boards featuring **VNF9D5F** and **VNF9Q20F** devices
- Connection to the **EV-SPC582B** microcontroller board via USB-A to mini-USB connector

### Description

The **STSW-EV-VNF9F** is a software package that includes a graphical user interface (GUI) and control firmware. It enables users to configure and control the 12 V eFuse devices (**VNF9D5F** and **VNF9Q20F**) which are mounted on the corresponding evaluation boards.

The **STSW-EV-VNF9F** has been developed using Embarcadero C++ and Microsoft Visual C# software tools. It is designed to work with **EV-SPC582B**, which is programmed with dedicated control firmware included in the software package.
