- Password management (password authentication, tag protection)
- Fast transfer mode (ST25DV-I2C series)

Description

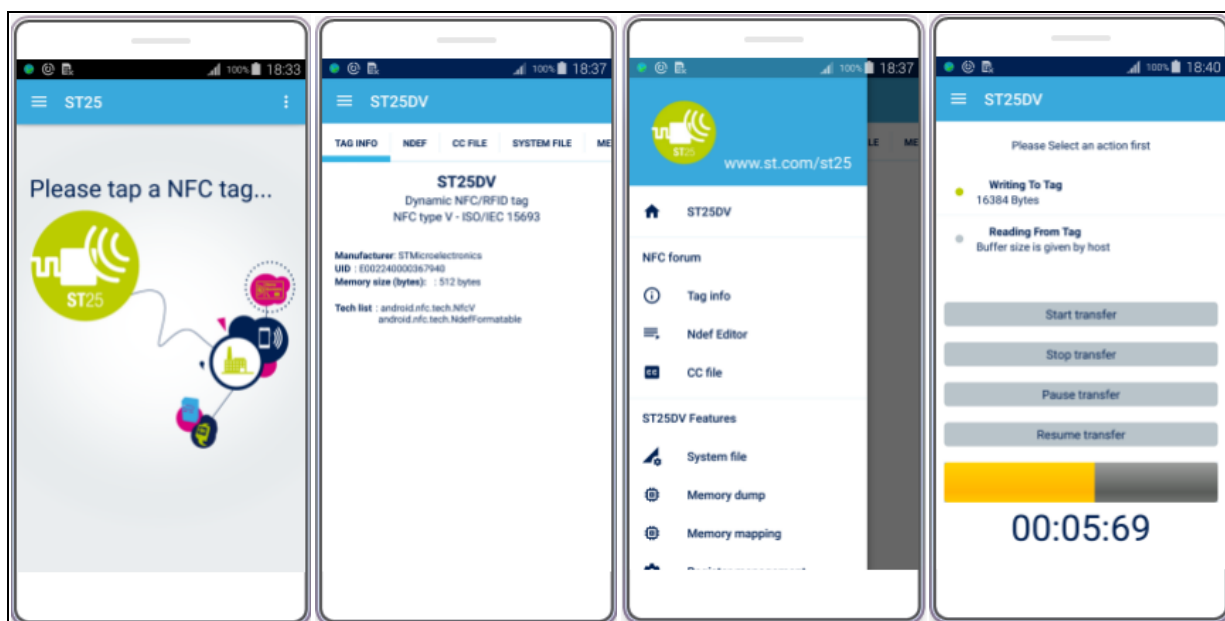

ST25 NFC Tap App (executable file STSW-ST25001, source code STSW-ST25002) is an Android application dedicated to handle ST25 NFC/RFID tags and Dynamic NFC tags.

This application allows the user to store or read NDEF messages, such as NDEF URL, SMS, Email, vCard (including picture), AAR and text.

NDEF Multi-records is also available.

Bluetooth® pairing NDEF message is also included in the package, which lets the user pair with a smart phone and stream audio via Bluetooth (only available with Discovery or premium kits).

Specific demonstration features (such as FW update, image transfer, LED toggle and setting configuration) are available and work with specific firmware and Discovery kits.
