TCPP01-M12

USB type-C port protection for USB power delivery

Features

- ESD protection IEC 61000-4-2 level 4 for CC1, CC2 and VBUS (±8 kV contact discharge, ±15 kV air discharge)
- 22 V overvoltage protection on CC lines against short-to-VBUS overvoltage
- Externally programmable Over Voltage Protection on VBUS line
- Integrated VBUS gate driver for external N-MOSFET
- Over temperature protection
- Integrated “dead battery” management
- Open-drain fault reporting
- Low power mode for battery-operated SINK applications
- Operating junction temperature from -40°C to 85°C
- ECOPACK®2 compliant

Applications

Where current limitation is required in factory automation application:

- USB type-C power delivery, PPS compliant
- USB type-C used in sink configuration
- USB type-C used in source configuration
- USB type-C for UFP (upstream facing port) or DFP (downstream facing port) configuration
- USB type-C used in dual role port

Description

The TCPP01-M12 (type-C port protection) is a single chip solution for USB type-C port protection that facilitates the migration from USB legacy connectors type-A or type-B to USB type-C connectors. The TCPP01-M12 features 22 V tolerant ESD protection as per IEC61000-4-2 Level 4 on USB type-C connector communication channel (CC) and VBUS lines. To allow fast certification for USB power delivery, the TCPP01-M12 provides overvoltage protection on CC1 and CC2 pins when these pins are subjected to short circuit with the VBUS pin that may happen when removing the USB type-C cable from its receptacle. For sink applications, TCPP01-M12 triggers an externally programmable N-MOSFET overvoltage protection on VBUS pin when a defective power source applies a voltage higher than selected OVP threshold. Also, the TCPP01-M12 integrates a “dead battery” management logic that is compliant with the USB power delivery specification. The VBUS N-MOSFET load driver can also be used in source applications.

Figure 2. USB Type-C power delivery – SINK application with battery (3.3 V to 22 V)

Note: DB/ is a pulled down TCPP01-M12 input: connect to 3.3V if not managed by MCU software T1 reference used in this example is STL11N3LLH6.
4 Package information

In order to meet environmental requirements, ST offers these devices in different grades of ECOPACK® packages, depending on their level of environmental compliance. ECOPACK® specifications, grade definitions and product status are available at: www.st.com. ECOPACK® is an ST trademark.
