Applications

The HSP061-2Y is designed to protect against electrostatic discharge on automotive circuits driving:

- APIX
- LVDS
- HDMI 1.3 and 1.4
- Ethernet
- Digital Video Interface
- Display Port
- USB 3.0
- Serial ATA
- High speed communication buses
- HMI

Description

The HSP061-2Y is a 2-channel ESD array with a rail to rail architecture designed specifically for the protection of high speed differential lines.

The ultralow variation of the capacitance ensures very low influence on signal-skew. The large bandwidth makes it compatible with 5 Gbps.
