Features

- Rail-to-rail input and output
- Low noise: 9 nV/√Hz
- Low distortion
- High output current: 80 mA (able to drive 32 Ω loads)
- High-speed: 4 MHz, 1 V/μs
- Operating from 2.7 to 12 V
- Low input offset voltage: 900 μV max. (TS922A)
- ESD internal protection: 2 kV
- Latch-up immunity

Applications

- Line drivers and actuator drivers
- Portable speakers
- Instrumentation with low noise as key factor
- Multimedia systems and portable equipments

Description

The TS922 and the TS922A devices are rail-to-rail dual BiCMOS operational amplifiers optimized and fully specified for 3 V and 5 V operations. These devices have high output currents which allow low-load impedances to be driven.

Very low noise, low distortion, low offset, and a high output current capability make these devices an excellent choice for high quality, low voltage, or battery operated audio systems.

The devices are stable for capacitive loads up to 500 pF.

</table>

1. All voltage values, except the differential voltage are with respect to network ground terminal.
2. The differential voltage is the non-inverting input terminal with respect to the inverting input terminal. If $V_{id} > \pm 1 \text{ V}$, the maximum input current must not exceed ±1 mA. In this case ($V_{id} > \pm 1 \text{ V}$), an input series resistor must be added to limit the input current.
3. Do not exceed 14 V.
4. Short-circuits can cause excessive heating. Destructive dissipation can result from simultaneous short-circuits on all amplifiers. These values are typical.
5. Human body model: 100 pF discharged through a 1.5 kΩ resistor between two pins of the device, done for all couples of pin combinations with other pins floating.
6. Machine model: a 200 pF capacitor is charged to the specified voltage, then discharged directly between two pins of the device with no external series resistor (internal resistor < 5 Ω). This is done for all couples of pin combinations with other pins floating.
7. Charged device model: all pins and plus package are charged together to the specified voltage and then discharged directly to ground.
8. There is no short-circuit protection inside the device: short-circuits from the output to $V_{CC}$ can cause excessive heating. The maximum output current is approximately 80 mA, independent of the magnitude of $V_{CC}$. Destructive dissipation can result from simultaneous short-circuits on all amplifiers.

<tbody>
<tr>
<td>01-Feb-2001</td>
<td>1</td>
<td>First release.</td>
</tr>
<tr>
<td>01-Jul-2004</td>
<td>2</td>
<td>Flip-chip package inserted in the document.</td>
</tr>
<tr>
<td>02-May-2005</td>
<td>3</td>
<td>Modifications in AMR Table 1 (explanation of $V_{id}$ and $V_i$ limits, ESD MM and CDM values added, $R_{BIP}$ added).</td>
</tr>
<tr>
<td>01-Aug-2005</td>
<td>4</td>
<td>PPAP references inserted in the datasheet, see Table 8.</td>
</tr>
<tr>
<td>01-Mar-2006</td>
<td>5</td>
<td>TS922EIJT part number inserted in the datasheet, see Table 8.</td>
</tr>
<tr>
<td>26-Jan-2007</td>
<td>6</td>
<td>Modifications in AMR Table 1 ($R_{BJC}$ added), parameter limits on full temperature range added in Table 3 and Table 4.</td>
</tr>
<tr>
<td>12-Nov-2007</td>
<td>7</td>
<td>Added notes on ESD in AMR table.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Re-formatted package information.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Added notes for automotive grade in order codes table.</td>
</tr>
<tr>
<td>02-Feb-2010</td>
<td>8</td>
<td>Document reformatted.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Added root part number TS922A on cover page.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Removed TS922AIYD order code from Table 8.</td>
</tr>
<tr>
<td>15-Jan-2013</td>
<td>9</td>
<td>Added MiniSO8 package.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Modified test conditions for CMR in Table 3 and Table 4.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Replaced $V_{DD}$ by $V_{CC}$ in title of Table 3, Table 4, and Table 5.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Updated titles of Figure 7 to Figure 12 (added conditions to differentiate them). Removed TS922IYD device from Table 8.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Minor corrections throughout document.</td>
</tr>
<tr>
<td>04-Jun-2013</td>
