

# STM32MP2 MPU series

## 64-bit microprocessors with Neural Processing Unit

**Industrial-grade 64-bit MPU for secure Industry 4.0 and advanced edge computing applications that require high-end multimedia capabilities.**

The STM32MP25 lines are the first of the STM32MP2 series.

These microprocessors (MPUs) are built around single or dual Arm® Cortex®-A35 cores running up to 1.5 GHz and a single Arm® Cortex®-M33 core running up to 400 MHz.

The STM32MP25 MPUs offer long-term and cost-optimized DRAM support (DDR4 and LPDDR4) with a 32-bit interface at 1.2 GHz.

The STM32MP25 lines enable edge AI solutions in industrial environments, thanks to a neural processing unit (NPU) up to 1.35 TOPS and 3D graphics processing unit (GPU) for advanced HMI.
