

OUR COMPANY
Independent supplier
Large portfolio
Teamwork
Agility

OUR PEOPLE
Engaged people
Experience
Resilience
Commitment
Service
Support

OUR SIGNAL CONDITIONING PORTFOLIO
Addressing 1.8 to 44 V applications
From -30 to 125°C operating temperature
Compliance with AEC-Q100
Tiny and wattable packages

ADDRESSING CHALLENGING MARKETS
Automotive
Industrial
Personal electronics
Communications equipment, computer and peripherals

WIDE HIGH-END ANALOG ICs SUPPLIER
50 years of experience in design and manufacturing
High-volume supplier
In-house technologies
High quality (CQI 01 point)
10-year longevity commitment

High-performance op amps samples

Nanopower		
TSU1025T	TSU1110Q1T	TSB835T
16 V / 36 V rail-to-rail		
TSX6625T	TSB5125T	TSB7191ALT
Accuracy / Speed		
TSZ1210CT	TSZ1510CT	TSZ1810T
High output current		
TSV7725T	TSV7825T	TSV7925T
Current sensing		
TSC2005T	TSC2100CT	TSC2005CT
		TSV7725ILT

Note: Samples for evaluation only

Precision op amps

Micro and Nanopower op amps

Current sensing

Comparators

Order the High-performance Op Amps sample kit !

Discover and test the high-performance op amps, comparators, and current sense amplifiers

A complete ecosystem to support design-in and shorten time to market

Simulation tool: Start your analog circuit design and simulate your project with eDesignSuite. Get a quick preview with fully annotated schematic and BOM and export to eSim for fast and accurate electrical simulations and reliable design validation.

Evaluation board: Learn more about op amps and comparators using our training kit. The STEVAL-CCA059V1 features a configurable board and 12 op amp adapter boards.

Mobile app: Download the ST Op Amps mobile app, all-in-one design toolkit and smart selector.

AND MORE: Visit our dedicated page www.st.com/OpAmpsTraining

Our values:

OUR COMPANY: Independent supplier, Large portfolio, Teamwork, Agility.

OUR PEOPLE: Engaged people, Expertise, Resilience, Commitment, Service, Support.

WIDE HIGH-END ANALOG ICs SUPPLIER: 50 years of experience in design and manufacturing, High-volume supplier, In-house technologies, High quality (6- σ DFT) part, 10-year long-term commitment.

OUR SIGNAL CONDITIONING PORTFOLIO: Addressing 1.5 to 4.5 applications, From -40 to 175°C operating temperature, From consistency to high performance, Compliance with AEC-Q100, Try and wearable flexible packages.

ADDRESSING CHALLENGING MARKETS: Automotive, Industrial, Personal electronics, Communications equipment, computer and peripherals.
