

STM32H5 series

Most powerful Arm Cortex®-M33 MCU yet

The STM32 portfolio

Five product categories

Short- and long-range connectivity

32- and 64-bit microprocessors

32-bit general-purpose microcontrollers: from 75 to 3,224 CoreMark score

Scalable security

If only

an MCU could give me more design freedom and speed up my time to market.

This is where we come in

If only

an MCU could offer certified & maintained security services.

This is where we come in

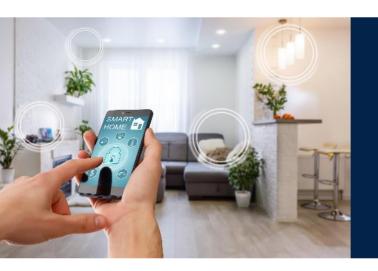

Introducing the STM32H5 MCU series for high-performance designs

STM32H5 simplifies the design of secure industrial applications

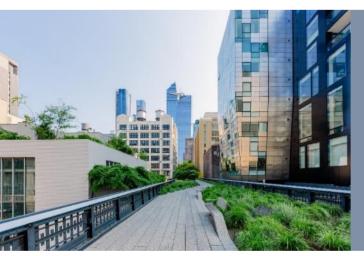

Smart homes

Air conditioning systems Fridges Alarm systems

Factory automation

PLCs Motor control Industrial pumps

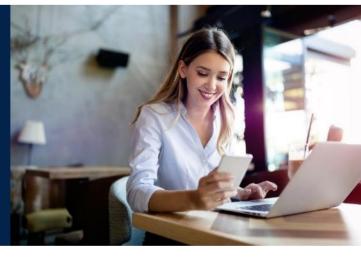

Smart cities

Communication gateways
Light control
Energy conversion

Consumer

Keyboards, tracking devices Medical accessories

Key features for factory automation

Design freedom in harsh environments

- High performance core at 250 MHz
- Large and robust embedded memory
- Extended temperature range, up to 125°C

Ready for Industry 4.0

- PSA Certified level 3 & SESIP3 target certifications
- SIL-ready enabled by native hardware features
- Extended connectivity (Ethernet MAC, FDCAN, MIPI-I3C, and USB)

Key features for IoT and connectivity systems

Performance in space-constrained devices

- High performance at 250 MHz
- Low power dissipation
 - 61 μA/MHz at 250 MHz
 - 1.7 V power supply
- Small package sizes

Simplified connectivity solution

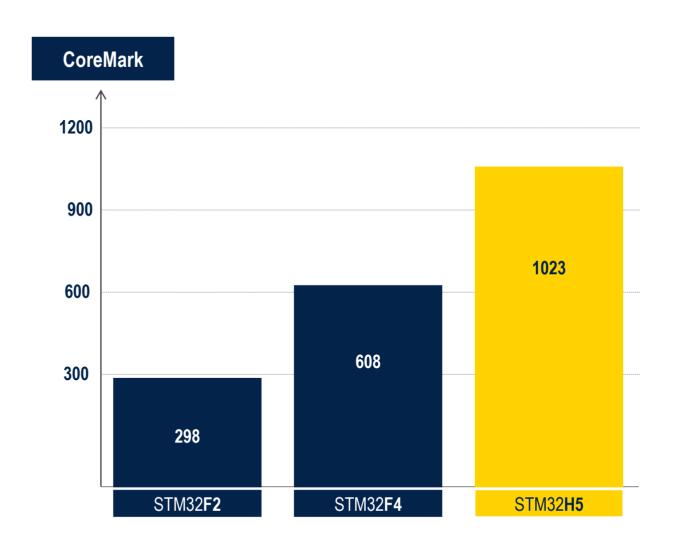

- Preprovisioned security keys for registration to cloud & OEM servers
- Extended connectivity (MIPI- I3C, SDMMC, USB, UCPD)

Boosting application performance

STM32H5

- Arm® Cortex®-M33 at 250 MHz
 375 DMIPS & 1023 CoreMark
- Instruction and data cache for internal and external memory (ART Accelerator)
- Mathematics accelerators:
 FMAC and Cordic

Flexible power modes

Efficient power consumption thanks to the switched-mode power supply option (SMPS)

VBAT 590 nA

Standby(RTC ON) 3.5 µA

Stop (with 16KB RAM) 51 µA

Stop (Full RAM retention) 57 μA

Run up to 250 MHz 61 μA / MHz

Typical: 25°C, V_{DD} = 3V, SMPS mode

StM32 Scalable security to boost your time to market

How many security building blocks do you need to reach your security goals?

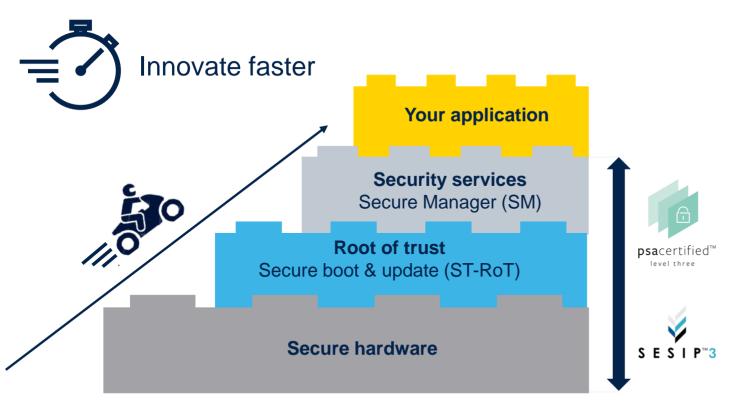

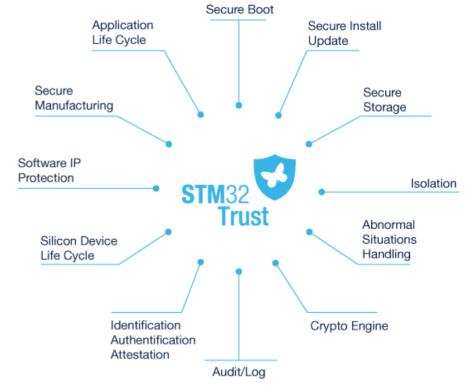

A scalable security offer to address your needs

Choose your preferred security offer: from secure hardware to the complete STM32Trust function coverage

The 12 STM32Trust security functions

Stronger security

Robust hardware features and turnkey SoC software implementations

Memory protections

against illegal access control

OTP, HDP, WRP, MPU Ext. Flash Decryption OTFDec Secure Debug Active Tamper

Platform authentication during product life cycle

2 boot stages
Protection level states
Debug authentication

Cryptography

for hardware robustness

Side channel AES, PKA Additional AES, PKA, SHA, TRNG, OTFDEC, HUK NIST - CAVP certified CryptoLib

Code isolation

for runtime protection

7 isolation stages Arm® TrustZone® technology Dedicated keystores

Turnkey SoC security services

Secure Manager

Easy registration to clouds & servers

Single or multitenant IP protection

Preintegrated third-party PKI life cycle

Immutable & Updatable Root of Trust

State-of-the-art security assurance level

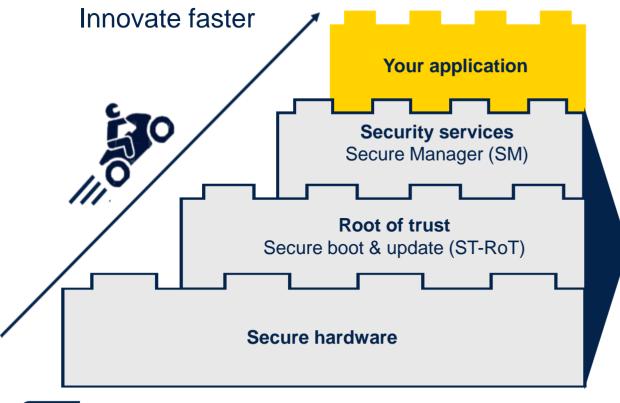

target certifications

Scope of Secure Manager

ST is the world's first MCU supplier to offer a certified and maintained TEE solution

Secure Manager

A **Trusted Execution Environment (**TEE) integrating core security services

Delivered as X-CUBE-SEC-M

- Simplified customer journey
- Seamless cloud/server support
- Supporting remote provisioning
- Single/Multi-tenant IP protection

The Secure Manager

Enhancing security while reducing costs and complexity

Multitenant IP protection

- Multiple business case made possible
- Isolation for confidentiality at installation & runtime
- Protected development flow

- Turnkey TEE security solution including services
- Certified secure implementation
- TrustZone® complexity abstraction
- Designed for LTS long-term service
- PSA API compliant

Cloud / Server

- Seamless cloud/server registration
- Preprovisioned keys & certificate
- PSA compliant attestation

Remote secret admin.

- Remote PKI life cycle management enabled
- Customizable (for example, Matter)
- Certificate installation/rotation/...
- Via partnership

STM32H5 series offers a scalable portfolio

Expanding the STM32H5 series with STM32H523/533 MCUs

	STM32H503	STM32H523	STM32H533	STM32H562	STM32H563	STM32H573
