

Getting started with the high power stepper motor driver expansion board based on powerSTEP01 for STM32 Nucleo

Introduction

The X-NUCLEO-IHM03A1 is a high power stepper motor driver expansion board based on the powerSTEP01. It provides an affordable and easy-to-use solution for driving high power bipolar stepper motors in your STM32 Nucleo project. The fully digital motion control through speed profile generation, dynamic positioning feedback and a complete suite of protection features offer high levels of performance and robustness The X-NUCLEO-IHM03A1 is compatible with the Arduino UNO R3 connector and supports the addition of other boards which can be stacked to drive up to three stepper motors with a single STM32 Nucleo board.

Figure 1. X-NUCLEO-IHM03A1 expansion board for STM32 Nucleo

Notice: For dedicated assistance, submit a request through our online support portal at www.st.com/support.

1 Getting started

The X-NUCLEO-IHM03A1 expansion board is a high power stepper motor driver covering a wide range of applications. In particular, the maximum ratings of the board are the following.

- Power stage supply voltage (VS) from 10.5 V to 50 V
- Motor phase current up to 10 A r.m.s.

Follow this sequence to start your project with the board:

- 1. Check the jumper position based on your configuration (see Section 2: Hardware description and configuration).
- 2. Plug the board to the STM32 Nucleo board through Arduino UNO R3 for the X-NUCLEO-IHM03A1.
- 3. Supply the board through the input 1 (VS) and 2 (ground) of the connector CN1. The power OK (green) and fault (red) LEDs will turn on.
- 4. Develop your application using the examples provided with the firmware library, X-CUBE-SPN3, high power stepper motor driver software expansion for STM32Cube. Further support material is available on the powerSTEP01 (www.st.com/powerstep) and STM32 Nucleo web pages (www.st.com/stm32nucleo).

Note: Up to three expansion boards can be stacked on the same STM32 Nucleo board as described in Section 2.2: Multi-motor configuration.

Not mounted	0 Ω	CN9 pin 4, CN10 pin 31

UM1910 - Rev 3 page 4/15

2.2 Multi-motor configuration

The expansion boards can be stacked on a single STM32 Nucleo board in order to drive up to the three stepper motors (one expansion board for each motor is required).

The configuration is changed by mounting the resistors from R3 to R8 as listed in Table 5. Multi-motor setup table. The other resistors are not mounted.

By default, the stepper driver board is configured for a single-motor setup, so the board configuration must be changed in multi-motor setups before stacking the boards on the STM32 Nucleo.

Table 5. Multi-motor setup table

Number of motors	Of Board	Mounted resistors
1	-	R3 – R8
2	1 (bottom)	R3 – R6
2	2 (top)	R4 – R8
	1 (bottom)	R3 – R6
3	2	R4 – R7
	3 (top)	R5 – R8

6 Regulatory compliance information

Notice for US Federal Communication Commission (FCC)

For evaluation only; not FCC approved for resale

FCC NOTICE - This kit is designed to allow:

(1) Product developers to evaluate electronic components, circuitry, or software associated with the kit to determine

whether to incorporate such items in a finished product and

(2) Software developers to write software applications for use with the end product.

This kit is not a finished product and when assembled may not be resold or otherwise marketed unless all required FCC equipment authorizations are first obtained. Operation is subject to the condition that this product not cause harmful interference to licensed radio stations and that this product accept harmful interference. Unless the assembled kit is designed to operate under part 15, part 18 or part 95 of this chapter, the operator of the kit must operate under the authority of an FCC license holder or must secure an experimental authorization under part 5 of this chapter 3.1.2.

Notice for Innovation, Science and Economic Development Canada (ISED)

For evaluation purposes only. This kit generates, uses, and can radiate radio frequency energy and has not been tested for compliance with the limits of computing devices pursuant to Industry Canada (IC) rules.

À des fins d'évaluation uniquement. Ce kit génère, utilise et peut émettre de l'énergie radiofréquence et n'a pas été testé pour sa conformité aux limites des appareils informatiques conformément aux règles d'Industrie Canada (IC).

Notice for the European Union

This device is in conformity with the essential requirements of the Directive 2014/30/EU (EMC) and of the Directive 2011/65/EU (RoHS II), including subsequent revisions and additions, as well as amended by the Delegated Directive 2015/863/EU (RoHS III), according to standards EN 55032:2015+A11:2020, EN IEC 61000-6-3:2021, EN 55035:2017+A11:2020, EN IEC 61000-6-1:2019 and EN IEC 63000:2018. Compliance to EMC standards in Class A (industrial intended use).

Notice for United Kingdom

Hereby, the manufacturer STMicroelectronics S.r.l. - Via Camillo Olivetti 2, 20864 Agrate Brianza (MB), Italy (UK site: STMicroelectronics Ltd - Atlas House, Third Avenue, Globe Business Park, Marlow, Bucks, SL7 1EY, United Kingdom), declares that this device is in compliance with the essential requirements of the Directive 2014/30/EU (EMC) and of the Directive 2011/65/EU (RoHS II), including subsequent revisions and additions, as well as amended by the Delegated Directive 2015/863/EU (RoHS III), according to standards EN 55032:2015+A11:2020, EN IEC 61000-6-3:2021, EN 55035:2017+A11:2020, EN IEC 61000-6-1:2019 and EN IEC 63000:2018. Compliance to EMC standards in Class A (industrial intended use).
